Alert Handling – Alert Name: Triggered: REVENUE-STREAMS PROD

This document guides how to address alerts related to missing Revenue Stream (Profit) files.

Currently, we have two clients enabled for Revenue Stream (Profit) files:

- 1. MGM
- 2. LVSANDS

The alerts are triggered when the Revenue Stream (Profit) files are not received for one or more properties associated with the respective client.

Alert details:

- MGM Alert Name: Triggered: REVENUE-STREAMS PROD – MGM file not processed
- LVSANDS Alert Name: Triggered: REVENUE-STREAMS PROD – LVSANDS file not processed

Example: Handling an MGM Alert

When you receive an alert email with the subject:

Triggered: REVENUE-STREAMS PROD – MGM file not processed, follow these steps:

Step 1:
Wait 30 minutes to check if a recovery alert is received.

[HLTN/Handling Error for SAS Dataset Encoding Job](#)

- If a recovery alert is received, no further action is needed.

Step 2:

If no recovery alert is received after 30 minutes, check if the job RevenueStreamsDataLoadJob has run for all MGM properties.

Step 3:

If the job has not run for certain properties, you may need to reach out to the client for further action.

Use the template below –

Hello Team,

We have not yet received the Revenue Stream (Profit) files for the following property(ies) for <DATE>:

- <PROPERTY1>
- <PROPERTY2>
- <PROPERTY3>

The last file we received from your end was dated <DATE of most recent file received>.

Kindly provide the missing Revenue Stream (Profit) files at your earliest convenience.

We appreciate your support.

In case you have any questions or concerns, please do not hesitate to email us at CARE@ideas.com
