Charter to Full uploads in the IDeaS RMS paradigm

Full decision upload – This type of task is typically an I priority case assigned to you by an ATL or a senior member in your team pertaining to a client requesting a full decision upload to its channels.

- **Why** do clients request Full decision files?
 - Many a times the rates are not in parity (meaning they're not identical across different channels) . For example imagine you're in Sydney and you're trying to look up rates for Four Seasons Sydney and as a purchaser you find an offer at say 100 AUD and your friend gets the same offer for the same dates at 75 AUD . You – as a guest may not be very happy – and attracts a negative sentiment from a client . If we simply change your role to someone who's responsible for maintaining rates for Four Season's Sydney – you'd want to now make sure that the same offer is available for a given date at nearly identical prices – except where markups are applicable on channels , otherwise typically the Hotel Site and rates on a local site would be nearly identical. Also Someone sitting in say Four Seasons Mumbai will also typically be offered nearly an identical rate for the same dates and identical offer (rooms/amenities etc.) . However at times they're not in synch due to various technical issues . To alleviate that IDeaS can generate a full file – meaning it can generate a file that contains rates for 'all' the dates in the future ,for that property – for the window , for the which the hotel has subscribed to as the decision window. Meaning , in the example above if , Four Seasons Sydney sells 365 days in advance – and that's the BAR window configured on the IDeaS side for the property (in Property System Parameters – which can be accessed via CMA) – the rates of 365 days will be pushed to ALL the channels that the hotel subscribes to , with IDeaS. (Typically it would be a

PMS and CRS along with a 3rd vendor like iHotelier /Synxis/Siteminder or Trust or Trust leading).

- What is the typical flow of tasks in SFDC for full decision upload
 - Typically – you would be assigned a task like Full decision upload. If you think that the BDE will fall in your shift – you should typically just use this task to complete the case – otherwise you can complete a task for full decision upload and issue another task for the next shift to ‘monitor decision upload’ to CARE department . Make sure the due date is correct in this case .
- Which of the following products does the Hotel subscribe to ?
 - G2
 - RMS
 - [Hilton](#)
 - [Non- Hilton](#)
 - [PS](#)
 - FMS
 - Decisions are never uploaded for an FMS property – you should review the casework fully before proceeding or responding back to the client. You should also notify CRM to seek clarification on issuance on such a case
 - G3
 - [ESA](#)
 - [GA](#)
 - Hilton
 - CARE does not do full for hilton G3 anymore – the request should go back to client to contact their liaison
