1 Introduction

1.1 Purpose

The purpose of this document is to create a crisp process for future communication with Oracle Team

1.2 Scope

This document will explain the step-by-step process to communicate with the Oracle team in different scenarios.

1.3 Intended Audience

The target audience for this document is the entire team members that require to communicate with the Oracle team.

2 Process

Note – Sarah McDonald and Lisa Waddington do not wish to be added to any direct client communication. **In case you feel the need to forward or tag them in an email, please see that the client is removed from the email.

1. The communication with Oracle team will be done via Slack.
2. If there is an urgent escalation wherein you need an urgent response or you encounter a delayed response from Oracle on Slack, reach out to the team leads across ICS who will email Sarah / Lisa.
3. Simultaneously tag Sarah and Lisa in urgent important follow ups on Slack stating the reason – Example: Client is following up and requires urgent attention.
4. Oracle might need up to 24 hours in a non-urgent scenario to assign a resource. In case you need an urgent response from Oracle, use points 2 and 3 above.
5. Since Sarah’s team is in the US and we are in India, we requested for a contact from Oracle available in our time zone. For this we can tag Sudhakara. Sarah will be speaking to Sudhakara as well as Sarah’s counterparts in the APAC region.
6. You can also flag CX tickets for which you feel need attention to be addressed to Ashwin/Sushant/ Vinay/Shivaji/ Nihar/ Karl to be discussed in the Oracle - IDeaS meeting every alternate Wednesday.

3 Exit Criteria

- Necessary communication is satisfactorily closed from both ends.
