Demand 360 Monitoring Process

Overview

TravelClick’s Demand360 product provides competitive market booking data, including pace information by market segment, which gives insight into future demand. G3 RMS offers an optional feature that allows G3 RMS to use TravelClick’s data. If you subscribe to this feature, you can view the data on the Demand360 dashboard and it influences the forecast and decisions in G3 RMS.

You can use the dashboard to compare Demand360 occupancy and forecast for the market to the equivalent data for your property. G3 RMS uses the data by first looking at the history of the competitive booking information and its relationship to your property’s transient demand. After the system learns the pace patterns, it adjusts future transient forecasts based on the future competitive booking pace information. The Demand360 data gives G3 RMS advanced warning of activity that would otherwise not be visible to the system.

Files required for Setup and Daily processing

- Demand 360 is a TravelClick Product. It pulls competitors Information & revenue from NGI and triggers it in G3.
- In the first configuration 12 files are sent by the TravelClick which basically contains the historical Data.

For e.g
146259_proplus_compset_historical.csv.gz

146259_proplus_group_hist_historical.csv.gz

146259_proplus_group_historical.csv.gz

108580_proplus_standard_historical.csv.gz

108580_proplus_standard_hist_historical.csv.gz

108580_proplus_compset_historical.csv.gz

108580_proplus_group_historical.csv.gz

108580_proplus_group_hist_historical.csv.gz

153039_proplus_standard_historical.csv.gz

153039_proplus_standard_hist_historical.csv.gz

153039_proplus_group_historical.csv.gz

153039_proplus_group_hist_historical.csv.gz

– Once the first configuration is over we receive 6 files once in a week normally on Wednesdays/Thursdays.

For e.g
81156_proplus_standard_h_20190327_170001.csv.gz

81156_proplus_standard_20190327_170001.csv.gz

81156_proplus_group_h_20190327_170001.csv.gz

81156_proplus_group_20190327_170001.csv.gz

81156_proplus_compset_20190327_170001.csv.gz

81156_proplus_capacity_20190327_170001.csv.gz

– Once the NGI receives all the 6/12 files of Demand 360 then a Demand360 Data Load Job gets triggered in G3.
– The Demand 360 data files are stored at the below location

http://us2pngiap01.ideasprod.int/NGI/Data/NGI.Springboot/demand360

ERRORS and RESOLUTIONS

Validation Errors

=====

1.

Unknown market segment details code encountered: 12

Error (Step level)

Validation failed for com.ideas.ngi.demand360.file.Demand360FileMetadata [Unexpected number of columns detected. Expected 8, found 1]

=====

This error means that TravelClick has provided blank/wrong/Invalid TravelClick id or Demand 360 id

2. Validation failed for com.ideas.ngi.demand360.entity.Demand360CompetitorSet ['travelClickPropertyId' may not be null, but was 'null']

This error means TC property ID is blank in the file. (Snippet below)

	A	B	C	D	E	F	G	H	I	J
	Subscriber Prop	Comp Set	As of Dat	Typ	Handoff Prop	TC Prop ID	Rubicon Prop	Provider Prop	Future	Name
75	302272	2402585	11/25/2019	Comp	359625		1123137	YTOAW		DE DELTA MISSISSAUGA DOWNTOWN
76										
77										

Action :

For both these errors, we have to validate the Demand 360 data files and send an email to TravelClick accordingly.

Below is an example and contact for the email.

Email Format:

Travel Support – enterprisebi.tc@amadeus.com

Hi Team,

We could not process the following files as we have received an invalid market segment codes 11 and 12 in the above extracts.

Below is the standard list of market segments and codes that we expect from TravelClick

Market_Seg_Detail_Code	Market_Seg_Group	Market_Seg_Name	Market_Seg_Detail
-1	-1 Other	-1 Other	Unknown
1	Transient	Discount	General Discount
2	Transient	Retail	General Retail
5	Group	Group	General Group
6	Transient	Negotiated	General Negotiated
7	Transient	Qualified	General Qualified
8	Transient	Wholesale	General Wholesale
9	Other	Other	Other

The file containing invalid market segment codes 11 and 12 are as follows (mention the file name for which we are observing the issue)

48156_proplus_standard_20180516_050000.csv.gz

48156_proplus_standard_h_20180516_050002.csv.gz

Could you please investigate it and resend the files post correction?

Thanks,

XYZ

Kindly send the above email, and abandon the failed job.

2: Duplicate Key Error

In this error we receive the duplicate records Demand 360 Data extract. This error usually occurs if the file name is duplicate.

Error (Problem Screen):

```
=====
=====
Error:Tetris Errors: [173 – NGI_REST_CLIENT_ERROR – No property quoteChar
found on entity class org.apache.commons.csv.CSVFormat to bind constructor
parameter to! – User.id: null – Workcontext: null]
=====
=====
```

-To validate that we have received duplicate data, kindly follow below steps :
- Execution steps(failed job)-> demand360FileCompletedChannel-> Error(below)

ERROR (Step Level)

```
=====
=====
com.ideas.ngi.nucleus.config.mongo.exception.NucleusMongoDuplicateKeyExceptio
n: Write failed with error code 11000 and error message 'E11000 duplicate key
error collection: ngi.nucleusCorrelationMetadata index:
uniqueNucleusCorrelationMetadata dup key: { : "DEMAND360_DATA_LOAD", :
"108580", : "108580_proplus_standard_hist_historical.csv.gz" }'
=====
=====
```

Action :

- We can then check the file name present in the error at the Demand 360 location given below.

<http://us2pngiap01.ideasprod.int/NGI/Data/NGI.Springboot/demand360/archive/>

- If the file is already present at the location, we can **Abandon** the job after checking at the archive location whether the file was first processed.

How to Populate the Latest Demand360 Data File

To update the latest Demand360 Data file, please follow these steps:

1. Navigate to Support
2. Click on Installation
3. Search for the property (e.g., *Kerry Hotel Hong Kong*)
4. Click on the Property Code
5. Go to Core Settings
6. Select Populate D360

Once completed, the latest Demand360 Data will be updated accordingly
