G3 Hilton Property Catch Up

Overview

The Catchup is a batch process to process CRS files through events which populates database. It contains some properties of catchup process and issues.

Purpose

The purpose of this document is to procedure catchup and to monitor the details on what happens when a catchup is started.

Procedure

Catch up of a property is batch process that with trigger the various business process events to process a CRS files through Ratchet and process the T2SNAP files and rate shopping files into G3. The Ratchet MSSQL database, Ratchet SAS datasets, G3 MSQl Tenant database, and G3 SAS datasets are all populated with data during catchup.

Catch up is started when a property is in stage Data Capture and can be continued while stage is catchup. The stage after Catch up is Population.

- Retrieve properties for catch up
 - » Support -> Installation Status -> Filter by
 - Min # of Extracts
 - Stage Data Capture

- Property Code
- Ensure property is ready for catch up
 - » History file is present
 - » There are files to process
 - » If Web Rate files are there
 - » If the Scheduled MCAT+ date
 - » Missing extracts are not more than expected (cannot start catch up if there are more than 7 consecutive days missing a CRS extract)
 - » Out of Order was received
 - » Stage is Data Capture
- Check and Proceed
 - » Check the box for the properties you want to start
 - » Verify the information in the popup
 - » “SRP Attribution Extract date” and “SRP Attribution Submitted Date” are mentioned in case.» Click on Data Mapping

Property Code	Property Name	Configuration File Loaded	Out of Order	Stagnated Rate Shipping Extract Count	Processed Rate Shipping Extract Count	Data Mapping Status	Data Mapping Initiated By	Recent Date Shipping Start Date	Data Mapping End Date	SRP Attribution Extract Date	SRP Attribution Submitted Date	Setup Completion Date	Scheduled Shipping Rate Date	Actual Shipping Rate Date
HILTON GARDEN INN CALGARY DOWNTOWN		20-Dec-2016	Yes	0										

- Enter the catchup dates in the data mapping popup and proceed.
- Monitor the catch up as extracts are processed the column with Processed Extracts Count will increase.**Some details on what happens when a catch up is started.**
 - The identified MCAT+ extract is retrieved and processed through Ratchet
 - The outcome of this is to populate the SRP Attributes into the MSSQL Ratchet db
 - Note that Ratchet data sets are used but deleted after the MCAT extract is processed
 - The MCAT extract is not populated, it is only used to for the SRP attributes
 - Applicable date range of CRS files are copied form the respective incoming folders to the catchup folder
 - Applicable date range of RSS files are copied form the respective incoming folders to the catchup
 - The catch up business process is started
 - The CRS and RSS files are processed in order by Date. The date in file name is used for ordering the files.
- Once the system is up to date – click on Apply configuration in the screen shot above and this completes the Phase II Configuration.
