Pranav Thakar on
Hilton/Processing Failure – non
positive offset value for Product

“Add Property” is an important part of the configuration step of the IDEaS Process.

[Data Flow](#)

This is one of the initial steps in the IDEaS Process.

The next important step is to install OPERA AGENT. Refer to :

[IDEaS G3-RMS OPERA Agent Installation Guide \(To be also used for Hyatt G3 Installation\) | CARE Knowledge Base \(sas.com\)](#)

A recommended step before you proceed with installation – is to collect all the necessary information once commences with the addition by using [this](#) utility

The information required to **Add Property** is:

- Client
- Property Name
- Property Code
- Property Time Zone
- Yield Currency (3 Letter Currency Code)
- Web Rate Alias (optional. The Web Rate Alias, is also known as the Subscription ID for Rate Shopping vendors.)
- CRS Timezone (optional)

Here is a screen shot of the **Add Property** form accessed from the [Support | Installation | Property] screen, and clicking the [Add Property] button:

Once you click Add property this should pull up a screen like below :

Ranjit on [Hilton/Processing Failure – non positive offset value for Product](#)

Ranjit on [Service Recovery Procedure – IDEASOperaAgent Service in “Stopping” State](#)

Ranjit on [Processing Failures Due to Data Type Mismatch for MGM Resorts](#)

Ranjit on [Accor Client Handling Process Guide](#)

Once you fill in all the details and hit 'save', go to Jobs screen and monitor the add property Job.

Typically this is completed in 2 minutes max. Typically the property should now reflect on the installation screen.

Go to Support>Installation>Select property>select correct chain > Search for the complete list of properties by hitting search. The property you added must be available on this screen/list now.

In most cases this job completes without any error. However if you encounter any errors in this job then you must escalate this to the IDEaS G3 QA team via a SFDC task/case.

Once you have added the client and property please complete the other configurations on G3 server with the help of standard template/Checklist.

Typically below parameters would be updated :

Property Name		SFDC Case->Account Detail	Account
SFDC Account Number	Unqiue code for each property. Account ID. e.g., XXXX-XXXX	SFDC Case->Account Detail	Account Number
G3 - Property Code	Unqiue code for each property which is ideally the last four digits of the Account ID. e.g., XXXX-XXXX	Account	Parent Account
What is the short 'Property or Resort Name' code in PMS?	pacman.integration.opera.operaResort	Agent Questionnaire	Opera Resort Code
Property Timezone (Hotel Timezone)	pacman.core.propertyTimeZone	SFDC Case->Account Detail	Timezone

Currency Code – This parameter is to set yieldcurrency at the property level	pacman.core.property.YieldCurrencyCode	Agent Questionnaire	NOTE – This is a Mandatory information
What <u>Pseudo Room</u> Types do you have in your PMS?	pacman.integration.pseudoRoomTypeCodes	Agent questionnaire	NOTE – This is a Mandatory information
	pacman.integration.opera.pastDays	Internal	From 1st Jan 2019 at property level for History Feed and 2 for Daily
GroupPastDays	pacman.integration.opera.groupPastDays	Internal	From 1st Jan 2019 for <u>Group</u> Pastdays for the first extract and then set the parameter to 540 daily from the next extract
	pacman.integration.futureDays	Internal	365 is a default value/Check with CPM/SFDC if needs to be different
			(Refer to SFDC Case comments as applicable)
BDE <u>Optimization</u> / Decision Window	pacman. <u>optimization</u> .optimizationWindowBDE	Agent Questionnaire / SFDC case–>Case comments and Detail	Should be set to Property at the property level
BDE <u>Forecast</u> Window	pacman.forecasting.forecastWindowBDE	Agent Questionnaire / SFDC case–>Case Comments and Detail	Should be set to Property at the property level
**In case of a <u>discrepancy</u> in SFDC case–>Case Comments and Detail values for the above BDE windows, reach out to the CPM.			
Is Currency Conversion is applicable?	pacman.core.property.ApplyYieldCurrency	Internal	Should be set to TRUE at the property level/ Information at SFDC Case Level
	pacman.core.property.BaseCurrencyCode	Internal	Update the Base Currency provided by the CPM
	pacman.integration.ratchet.yieldCurrencyCode	Internal	Should be same as pacman.core.property.YieldCurrencyCode
Is extract creation by Room Types?	pacman.integration.opera.roomTypesToInclude	SFDC Case Comments	<u>Room Type</u> list is provided by PM for only which the extract is created
If Limited Data <u>Build</u> Property			Get a confirmation from PM, how many days of past data Hotel has at present and then set a past days (If its less that 45 then open a task and assign it to care to update past days to 45 accordingly)
CDP Configuration	pacman.forecasting.forecastWindowCDP	SFDC Case–>Detail	CDP <u>Forecast</u> and Decision Window (Default value is 45)

	pacman. <u>optimization</u> .optimizationWindowCDP	SFDC Case->Detail	CDP <u>Forecast</u> and Decision Window (Default value is 45)
Modules		SFDC Case ->Detail	
Feature Toggles <u>Fenced</u>			
<u>Group Pricing Module</u>		SFDC Case->Account Detail	Should be set to Client at the property level
<u>Group Wash by Group</u>	pacman.feature.GroupWashByGroupEnabled	SFDC Case->Account Detail	Should be set to Client at the property level
What-if scenarios	pacman.feature.WhatIfEnabled	SFDC Case->Account Detail	Should be set to Client at the property level
Feature Toggles Pre-Production			
Analytical MS (Yes/No)		SFDC Case->Account Detail	For LDB , this parameter must be set to False. For Standard <u>build</u> , set this parameter to True at Client Level.
IP BAR			
BAR Type		SFDC Case->Account Detail	Default for BAR by Day(RateOfDay), Or BAR by LOS
	pacman.bar.EnableSingleBarDecision	Internal	Should be TURE when client is not able to accept different <u>decisions</u> by different <u>Room Class</u>
	pacman.bar.AllowMinMaxLOSOOverride	Internal	Default for BAR by Day(RateOfDay), True for BAR by LOS
<u>Rate Shopping</u>			
Web Rate Alias	pacman.bar.webRateAlias	RSS Feed	Is available in the RSS Feed if available
	pacman.bar.webRateSource	RSS Feed	Is available in the RSS Feed if available
Feature Toggles <u>Fenced</u>			
	pacman.feature.isContinuousPricingEnabled		Indicates whether Configuration Pricing should be turned ON or not. NOTE - Currently whenever continuous pricing is turned ON, the same needs to be turned on in SAS new feature file as well.

1. Many updates on these parameters would be updated with appropriate values by the SFDC connector utility. Whatever is not updated from the list above - must be updated manually to ensure we do not miss out on updating correct information.
2. Complete the configurations on G3 Server correctly and completely. One must go to Support>Configuration>selection of correct property and then updating each of these parameters .
3. Attach the updated sheet back to the case
4. Assign a task to review the configurations. [Peer Review].

Audit Points:

1. Please check following points are correctly entered:

The information required to Add Property is:

Client

Property Name

Property Code

Property Time Zone

Yield Currency (3 Letter Currency Code)

Web Rate Alias (optional. The Web Rate Alias, is also known as the Subscription ID for Rate Shopping vendors.)

2. All the jobs are completed successfully for Add Property

3. Ensure all other configurations are completed as per the requirements

Property Timezone (Hotel Timezone)

Currency Code – This parameter is to set yield currency at the property level

What Pseudo Room Types do you have in your PMS?

Web Rate Shopping

BDE Optimization / Decision Window

Rev No.	Revision Date	Description	Reason for Change	Revised By
0.1	03-14-2023	Document updated	Updated the parameters and checklist	Karl, Ashwin Danke and Nikhil Hatwalne
