G3 LDB – Limited Data Build Macro Requirements

ICS Team,

With reference to LDB functionality and LDB Macro Requirements.

Please do not directly reassign task back to Case Owner or keep a WOC to client (in case if Hilton) where in we see that LDB macro job is failing with errors like:

Insufficient Projections Data Available LDB Configuration Is Not Complete

Please be more vigilant and try to understand why system is throwing a particular error and if it's a valid one then we can let case owner/client know but that too with providing exact details.

Also, please go through the below logic – How real + projected data can be simulated so that LDB macro can run accordingly:

When real data start date / First Date system will use actual history is before system today, then it calculate days between system date and Hotel opening date. If First Date system will use actual history is after system date, then client needs to upload projections from system today + 365 days.

- For example, First Date system will use actual history is on 1st December 2020, which is after system today. So client needs to upload projections to fulfil the 365 days.

• If First Date system will use actual history is 27th October 2020, considering system today as 27th November 2020, then client needs to upload projection for 11 months, as 1month can be used as real data.

• Code snippet:

```
public boolean areSufficientProjectionsAvailable() {
    int projectionDays = projectionDataService.getNumberOfFutureProjectionDays();
    if (projectionDays >= 365) {
        return true;
    }
    LocalDate realDataStartDate = computeRealDataStartDate();
    if (realDataStartDate == null) {
        return false;
    }
    LocalDate validDataStartDate = realDataStartDate;
    LocalDate today = LocalDate.now();
    if (validDataStartDate.isAfter(today)) {
        return false;
    }
    int validRealDays = Days.daysBetween(validDataStartDate, today).getDays() + 1;
    return projectionDays + validRealDays >= 365;
}
```

Please reach out to Nihar/Niraj/Nikhil if you have any further questions. Thanks!
