G3 – GA Catch up Step

G3 – Catch up Step is the process of undertaking ‘one’ step out many and is NOT THE ENTIRETY OF CATCH UP PROCEDURE TASK – MEANING – THIS DOCUMENT OR GUIDELINE DOES NOT OUTLINE THE FULL CATCH UP PROCEDURE – BUT ONLY ONE OF THE MANY STEPS USED IN THE BVS ACTIVITY)

- Typically once Roll Back is completed it is expected that all extracts that are present are populated back in property DB in G3. To do so , do the following
 - Login to prod 2
 - Go to (1)Support> (2)Installation>(3)Property.
 - Make sure now that the property you are selecting again is correct and search property by either its name or code (4) . Hit search (5)
 - This should give you the property in the pane below. Under action tab you have ACTION (7) button and clicking the dropdown gives you the ‘DATA RECOVERY’ which appears as a hyper link .

- By default now you’d be offered to catchup the site with extracts upto the latest date available to the system. You should select that and Hit run. Note that if the overall performance of the G3 environment is affected or

there is an advisory notification issued by the Technology team – please ensure that you do this in smaller chunks. You can repeat the same process but for smaller number days of extracts, in that condition.

- Once all the data has been caught up, the system mode will automatically change to Data Population Mode. In case the catch-up activity runs for a longer period, the latest data loads will be sitting back in the queue unprocessed. Hence, we need to run the catch-up again once the previous batch is completed.

Audit Points:

1. The property is in Prod 2. Check property name.
2. Is the Roll Back completed?
3. Is the system mode – Data Population?
