G3 : Granting Access to Hotel End users (task type : G3-I7 System Access)

How to enable Grant access to Hotel End users to G3 RMS . (IDeaS task : G3-I7 System Access).

Typically this task would come strictly only via the IDeaS Project Manager for the hotel.

- If a Hotel directly seeks access – please re-direct them to the IDeaS project Manager for further assistance.
- CARE ‘must not’ grant access without written consent from the IDeaS CPM (Project Manager) for the property.
- Once CARE has the task with a subject G3-I7 System Access and its due dated and you’re on the same date as the due date then please use the instructions below to proceed further.
- NOTE of Precaution : **CARE must reach out to the CPM via lync/Skype , in advance before the access is granted** . This is to remove any ambiguity. Compliance to this is mandatory. Only once does the PM approve of granting access to the said user would CARE initiate the procedure. Otherwise ask the CPM to correct task comments and approve and then only complete the process. Also note As part of user privacy compliance IDeaS must ensure that right set of users have the right set of access to the right set of properties. Meaning, for example , a Four seasons user should NOT get access to a Scandic property and vice versa.
 - Login to the the correct G3 application URL (Prod1 or Prod 2 – as the case maybe). Typically this would be for Prod 2 clients only.

- By default you'd see the default landing page.

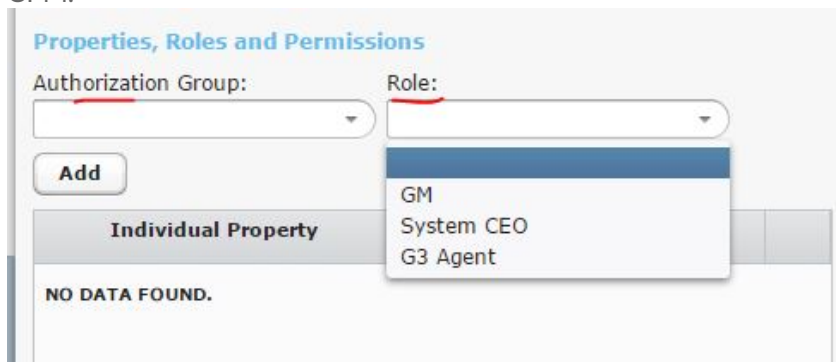

- Critical:** Correct the landing page by selecting the client for whom you wish to grant access to the IDEaS G3 RMS application.

- Go to Authorizations > User management .

- Under User management : enter the following details correctly :
 - First Name
 - Last Name
 - email (Login ID)
 - Verify email (email entered in the previous field should be identical to the one entered here).
- Select the correct role – per task comments/confirmation from the IDEaS CPM.

- Select any authorization groups if advised as well
- Verify the details once again to make sure that the information entered is correct and valid .
- Hit create .
- Once create is completed email notification would be issued to those users granting this access privilege to the hotels which you selected and the role which you granted.
