G3 – MASS BAR Upload failures.

The procedure below will help you understand one of the causes of Mass Bar Upload failure in G3.

- A Mass Bar Failure will be observed in the Summary Screen whenever the end user is trying to upload a Mass Bar Sheet with incorrect configuration.
- A most common failure will be as follows;
 - Start date cannot be after details Start date or end Date cannot be before details end Date.
 - Once the failure is registered in the G3 dashboard, the immediate step is to notify the client about it. We need to request the client to provide us the sheet they are using, to review the configurations.

- The BAR Rate Plan Start Date and the BAR Rate Plan End Date are the seasonal details of the rate plan (Eg; G1, G2, G3, etc. Refer the below screenshot)
- The Room Class column contains the Room Classes defined for the property.
- The Room Type column will contain the Room Types mapped to the specific room classes

While defining a rate plan (G1, G2, G3, Etc) season, the client needs to ensure that they are configuring one long season (i.e 1 start date and 1 end date).

Usually, it is observed that the end user configures multiple seasons for a Rate Plan
E.g; In the above Screenshot, the client has configured 3 seasons for Rateplan G1;
•28-Aug-2017 to 02-Aug-2018
•03-Aug-2018 to 26-Aug-2018
•27-Aug-2018 to 31-Dec-2019

Whereas it should be one long season from 28-Aug-2017 to 31-Dec-2019.

The next part is the Rate Details Start Date and the Rate Details End Date configuration.

- 1.This is where the Room Class- Room type mapping seasons will be defined.
- 2.The client can configure multiple seasons here, as long as they don't overlap.

Refer the below screenshot for better understanding;

The ideal configuration is;

Property	Property	BAR Rate Plan Name	BAR Rate Plan Start Date	BAR Rate Plan End Date	Room Class	Room Type	Rate Details Start Date	Rate Details End Date	Value Sunday	Value Monday	Value Tuesday
1	990844 Ibis Styles Edinburgh Centre St Andrew Square	G1	28-Aug-2017	31-Dec-2019	STANDARD	DBL	28-Aug-2017	02-Aug-2018	42.67	42.67	42.67

Great article Pranav 😊 – could you also add details for the below error?
Room Type value does not conform to the Room Class Order
