G3 – Monitoring – improvements in Monitoring – 5.3.2 Release 27th Aug 2018

This video illustrates the new feature released as part of G3 monitoring framework which is the ability to add notes to exceptions generated .

Do note that once notes are closed you CANNOT add notes again – its sealed off . So its critical that you make right selections once updating notes.

This is much awaited feature. Thank you. One question- Can we have this enabled to update notes by multi selecting the exceptions?

Nice enhancement. Can further be enhanced by automatically adding comments when the user adds logs from the installation screen.
