Run SQL

Selected Query: **Query to find Competitor Rate for a given Occupancy Date, Competitor name in Report**  
SFDC Case:  [Get](#)

Select Chains:

Select Property:

Selected Delimiter:   
Query Description: Query to find Competitor Rate for a given Occupancy Date, Competitor name in Report

Query Set:

```

SELECT
Webrate_generationDate,@competitorName,occupancy_dt,min(Webrate_rateValue)
competitorRate from webrate
WHERE occupancy_dt between @From_occupancy_date and @To_occupancy_date
AND webrate_channel_id = (select webrate_channel_id from webrate_channel where
webrate_channel_name = @channelName and status_id in (1,3))
AND webrate_competitors_id =(select webrate_competitors_id from
webrate_competitors where webrate_competitors_name = @competitorName and
status_id in (1,3))
AND LOS = 1
AND webrate_status ='A'
AND webrate_accom_type_id in (select webrate_accom_type_id from
webrate_accom_class_mapping
where accom_class_id in (select accom_class_id from accom_class where
master_class =1))
group by webrate_generationDate,occupancy_dt
order by webrate_generationDate desc;

```

Query Parameters:

|                             |                                                            |
|-----------------------------|------------------------------------------------------------|
| competitorName( String )    | <input type="text" value="Country Inn &amp; Suites by R"/> |
| From_occupancy_date( Date ) | <input type="text" value="2018-12-22"/>                    |
| To_occupancy_date( Date )   | <input type="text" value="2018-12-23"/>                    |
| channelName( String )       | <input type="text" value="brand.com"/>                     |

[Run SQL](#)
[Schedule SQL](#)

Inputs you'd require are as follows

- competitorName( String )

■

This should be the name of the competitor for which you're trying to find out if that competitors information has been sent to the subscribing property . In this case – SAVWB – Homewood Suites by Hilton Savannah is the subscribing property and its competitor for which we want to find out information is Country Inn & Suites by Radisson, Savannah. However The names must be picked up from the UI , from rate shopping configuration ' as is ' and hence would be only "Country Inn & Suites by Radisson, Savann" . Pick the nname from step 5 section in the image

below.

- From\_occupancy\_date( Date )

■

The start range of date from where the client is reporting that data is missing. Must be in the formant YYYY-MM-DD

- To\_occupancy\_date( Date )

■

The end date from a range of date where the client is reporting that data is missing. Must be in the formant YYYY-MM-DD

- channelName( String )

The typical Default channel which the property has configured for the property. In this example instance 'Brand.com'.

## Verification step :

The result of the query above should result in a job and that job should be monitored to give you a result. If the result looks like below , ie. with some data , suggesting then

that vendor is sending data for the said competitor.
