G3-GA Update Group Evaluation Window

Follow the below steps whenever there is a request to change/extend Group Evaluation Window:-

If there is a request that the Group Evaluation needs to be run for “x” number of days.

We need to change the below parameters at property level;

1) pacman.forecasting.forecastWindowBDE='x'

2) pacman.integration.opera.futureDays='x'

Note: – After changing the above parameters, first verify the newly created data extract and then you need to run a sync.

We have 2 options to verify the data feed:-

1) We can check this by running Data Extraction Report.

2) Go to monitoring Dashboard -> Jobs -> <select property> -> Open job “Opera Data Load” ->Execution Steps ->BDEForecastingServiceStep (Expand this job) ->In the Value Column click on <SASRequest>

Check fcstStartDate> and </fcstEndDate>. The difference should be “x” number of days.

Refer below example:

To run Sync, set the below parameter to True and run sync.

1) Pacman.core.property.sync.syncRequiredAccommodationConfigurationChanged to True.

Ensure that the sync is run after changing the previously mentioned two parameters.
