G3-Opera Exceptions and Solutions

This document will give you an insight of the issues that we usually encounter during Processing in G3 Opera Properties. Here, we have taken most common failures that we have encountered. CARE can use this as a reference document for investigating the failures and then can take the appropriate action.

1] Purge global data

=====

Tetris Errors: [0 – UNEXPECTED_ERROR – Error occurred during purge operation – User.id: null – Workcontext: null] Cause :
javax.ejb.EJBTransactionRolledbackException:
org.hibernate.exception.SQLGrammarException: could not execute statement Cause : javax.persistence.PersistenceException:
org.hibernate.exception.SQLGrammarException: could not execute statement Cause : org.hibernate.exception.SQLGrammarException: could not execute statement Cause : com.microsoft.sqlserver.jdbc.SQLServerException: Invalid object name 'Property_Daily_KPIs'.

=====

- Fixed as part of defect [DE5948] and deployed in month of Jan 18
- If you observe any such issues in the future, kindly escalate the task to QA

2] Opera Decision Delivery Job

“grammar []; nested exception is java.sql.SQLException: ORA-06550: line 1, column 1073:

PLS-00201: identifier ‘ROOMTYPE’ must be declared

ORA-06550: line 1, column 1073:

PL/SQL: Statement ignored”

- Fixed as part of defect [DE6094] and deployed in month of Feb 18
- If you observe any such issues in the future, kindly escalate the task to QA.

3] Opera data creation job

Cannot request feed for property 0015: Ineligible because there is already an active OperaDataFeedJob for this property

- The error usually arise when there is an already active Data Feed job for the property.
- The job that is active (may be failed) does not have the client code as well as the property code mentioned.
- In this scenario, you may find the active job or the failed job that does not have the property code as well as the client code mentioned, from [[JOB_INSTANCE_WORK_CONTEXT]] and you may abandon the job.
- Once we will abandon the job, we will be able to add a new feed for the property, thus resolving the issue.

4] Opera Decision Delivery Job

The property has null values in the daily bar decisions

- Error caused due to a rare data condition
- In case the error occurs, kindly escalate the task to QA team

teTaskService.java:335)
```

- The issue is a time zone related issue.
- Here, the issue arises as we check the same business date on every feed call.
- To resolve the issue, we need to change the timezone of agent installed machine to the timezone as that of city.
- Once the timezone is changed, we need to restart the agent service and then resume the failure for the property.

## 7] FPLOSQLqualifiedRecommendationStep

=====

=====

Tetris Errors: [34 – DATABASE\_EXCEPTION – executeBatch failed for calculate FPLOS – User.id: null – Workcontext: null] Cause :  
com.microsoft.sqlserver.jdbc.SQLServerException: Violation of PRIMARY KEY constraint 'PK\_temp\_qualified\_fplos\_pid\_991966\_1a'. Cannot insert duplicate key in object 'dbo.#temp\_qualified\_fplos\_pid\_991966\_1a'. The duplicate key value is (1, 2019-03-01, 194).

=====

=====

- This issue occurs when overlapping seasons are been detected in the system
- To resolve this issue, you may run the “**Find overlapping qualified rate reason**” query available in CMA.
- This query provides the details about the overlapping seasons for the property.
- Once you get the details about the overlapping seasons, you may run the “**Resolve the Qualified Rate detail overlap issue**” query from CMA.
- After this query is completed, resume the failed job.

## 8] operaDataFeedValidationStep

Error:

=====

Spring batch job processing failed because there was a feed validation error.

Feed validation failed for Transaction.

- User.id: null – Workcontext: null]

=====

=

Kindly find the error in Logs:

15715130, 15715333, 15715412] have invalid Room Type

2]

=====

=====

ERROR[OperaTransactionFeedValidationService:161] OperaFeedValidationStep  
Failed: Reservation ID : [812980, 812980, 812980, 812980, 812980] have invalid  
Market Segment

=====

=====

Run the below query:

**“Find out Reservation in FULL with Blank Room Type or Blank MS of received transactions”**

- Check whether we are receiving correct data for eg. **No blank room types/ blank market segments**
- If yes, then depending upon the error, kindly send an email to the client highlighting the same.
- If the data that we are receiving is correct, then escalate a task to QA recording all of the investigation steps that we have gone through.

9] **Job Name- NGI Deferred Delivery Job/NGI CDP Deferred Delivery Job**  
**Step Name-FPLOSQualifiedRecommendationStep**

Error:

=====

javax.ejb.EJBTransactionRolledbackException: Transaction rolled back Cause :  
javax.transaction.RollbackException: WFLYEJB0447: Transaction 'TransactionImple

< ac, BasicAction: 0:ffffac13ce84:509493bb:5c98c439:142a3460 status:  
ActionStatus.ABORTED >' was already rolled back  
=====

Resolution

- 1) Try resumming the failiure 2-3 Times [If not work follow point 2]
- 2) Change the value of parameter  
“pacman.feature.fplos.forceLegacyCardinalityEstimator” at property level to true  
resumed the job. [If not work follow point 3]
- 3) Escalate to QA with the details.
