G3: LRA (Last Room Availability) Restriction enablement and basic configuration check

Introduction:

[CRM Quick Reference Guide_Last Room Availability \(LRA\) Functionality v4](#)

Last Room Availability: G3 RMS offers automated LRA restrictions. When this functionality is enabled, G3 RMS automatically sends controls to prevent LRA business from displacing higher-value business.

To use LRA restrictions, your Reservation System must support the functionality.

When this feature is enabled, and the RMS recognizes the opportunity, the RMS will dynamically create open/close Restrictions on both LRA AND Unqualified BAR to slow the pick-up of LRA demand to retain inventory for the later booking and higher valued Unqualified BAR business. Once the RMS calculates the LRA booking window has sufficiently passed, it will re-evaluate and remove the restrictions.

Dates whereby the RMS has identified that the LRA demand is impacting the BAR demand and inventory availability – the RMS will display icon in the Daily Status row of the Business Analysis – Summary Dashboard.

Configuration Procedure:

[illegible]

- Last Room Availability Restrictions:** LRA Restrictions set to be applied at Rate Code/Rate Category level by the user when BAR is impacted. **The Rate Codes should consist of both LRA Rates as well as Public Rates.**

Configure Last Room Availability Restrictions

1. pacman.integration.opera.LRAControlFPLOS.uploadtype,
2. pacman.integrations.opera.LRAControlMinLOS.uploadtype
3. pacman.integration.ihotelier.LRAControlFPLOS.uploadtype
4. pacman.integration.ihotelier.LRAControlMinLOS.uploadtype

5) Client to review and verify the **Restrictions** are governing properly in selling systems (attach written confirmation to case)
