G3: PMS Migration : OXI to Agent; HTNG to Agent; Agent to Agent (Cloud)

PMS Migration Steps Guidelines

Introduction and Objective

This document mainly involves guidance and steps related to OXI to Agent migration, HTNG to Agent migration and Agent to Agent (Cloud) migration.

Using below steps one can perform or work on any of the above 3 mentioned migrations.

Step 1 – Send and discuss PID with client

Case Owner to send out the PID Primary Inbound Data Switch Questionnaire and discuss content with client. Case owner also familiarize themselves with supporting migration content: PMS Migration Guide.

Step 2 – Attach PID form and SOW on case level

Case Owner to Attach the completed PID form and SOW to the case.

Step 3 – Attach AGENT Questionnaire to case

Case Owner to Attach AGENT Questionnaire to case.

Step 4 – Migration Date Information

Case owner to enter migration date into case description along with cut over date, name and version of the new PMS, details of any changes in configuration moving from the old PMS to the New PMS.

Step 5 – Migration Changes

Case owner to confirm changes in (Group Code/Group ID, Reservation ID, Rate Codes, Market Segment and Room Types)

This is very important information which decides if a particular migration activity is with or without AMS recoding accordingly.

Step 6 – Provide Migration Sheet to the case owner

Case owner to discuss the migration sheet with the client and provide the necessary mapping. To be provided if there are any changes mentioned in Step 5.

Step 7 – Migration Changes_Pre Data-Collection

ROA to execute this step/task

Step 8 – Active Block/In-House and Future Reservations Check

ICS to confirm below in G3 via CMA for current Integration/PMS and enter details in the task to close it.

Active Blocks (Query – Group Mapping for PMS migration) – Attach sheet to the case.

Total Reservations (Query – PMS Migration – Reservation Check) – Update count in task description.

Step 9 – Configure/Confirm Agent user under Chain Check

ICS to configure/confirm Agent user under Chain.

For Agent to Agent (Cloud) migration, this should have already been created.

For OXI to Agent migration & HTNG to Agent migration, Orchestrator job will auto create this user.

In either of the case, please cross check it by navigating to Configure -> Permissions -> User Management.

Step 10 – Set property to Trigger Migration

This is very important task which needs to be executed at least 2 days prior to migration/cut-off date.

Add property under Migration screen (Details to look for in case description)

Update the Last Extract Date from Current External System (migration/cut-off date)

Enable migration parameter – pacman.feature.PMSMigrationEnabled to set True

The screenshot shows the IDEAS G3 RMS Installation window. The 'PMS Migration' tab is active. Below the search bar, the 'Client Name' is 'ACCOR HOTELS' and the 'Client Code' is 'ACCORDMS'. The 'Add Migration Config' button is highlighted. Below this, a table shows the migration progress for the selected client.

Actions	Client Name	Client Code	Property	Old System	New System	Old System Date	New System Date	Room Types Changed	Market Segments / Rate Code Changed	Group Codes Changed	Property Code Changed	Migration Status	System Mode	Progress
Actions	ACCOR HOTELS	ACCORDMS	5591	OHI	Opera	30-Nov-2022	01-Dec-2022	No	No	No	No	PMS Migration Complete	Decision Delivery Mode	100%

Step 11 – Peer Review

Senior team member to do Peer Review of PID/Migration Screen/Date/Agent User

Step 12 – Monitor Orchestrator Job

On the date of migration – ICS to Monitor Orchestrator Job and review alerts and update the case owner accordingly. Property auto moves to Dormant mode.

Step 13 – Configure Property and Action Migration Alerts

ICS to Change all applicable Integration configuration in G3 – external system, subsystem, resort code, past days, and group past days. This needs to be executed once PMS Migration Configure Inbound alert is triggered and actioned/resolved.

Step 14 – Request Oracle confirmation to stop sending data to IDEaS via OXI

ICS or case owner to Request Client/Oracle to confirm OXI Processor is stopped and disabled for IDEASRMS2/Publisher Mapping and ATS removed accordingly.

*****Not applicable to Agent-to-Agent Migration*****

Step 15 – Confirmation on Messages stopped being received in NGI

ICS to verify that no data is received in NGI. Do not close this task unless confirmed by vendor – continue follow up and continue with migration activity accordingly.

*****Not applicable to Agent-to-Agent Migration*****

Step 16 – Install Agent

ICS to install the IDEaS G3 agent by taking a remote connection in case of On-premises migration.

ICS to assist Oracle AMS team to install the IDEaS G3 agent in Oracle’s DC in case of Opera Cloud migration.

Step 17 – Confirm IDEaS Seeded User is Activated

ICS to check with client if OPP_IDEA license is active, and IDEaS seeded user **IDEAS** is enabled in case of On-premises migration.

Task can be closed in case of Opera Cloud migration as Oracle AMS team takes care of it as a part of their configuration.

Step 18 – Extract Creation

ICS to monitor the extraction post successful PMS connection and ensure past days and group past days to be set as per the migration cutoff date. Property should be in Data capture mode during this.

Step 19 – Extract Validation

ICS to Validate Past and Group Past days data received in the extract – capacity/solds/revenue/transaction count/blocks/room types/Market segments/Rate codes.

Step 20 – Review Active Groups received & In House and Future reservations

ICS to compare data count received from old PMS (Reservation and Group Blocks) If there are changes to the Group blocks then Group mapping is required and need to assign a task to CSS/QA by providing Old Group IDs vs New Group IDs (Please check with senior team member before assigning the task)

Step 21 – System Catch up

ICS to Catch-up property from newly received data extract and once catch up is complete, move the property to Decision creation mode. Catch-up RSS data from the Cutoff date. Also, run force sync once RSS catch up is complete.

Step 22 – AMS Changes

NA for LDB property

ICS to refresh the AMS screen in G3. This will allow the user to complete the AMS config for new MS. Update case owner on chatter requesting client to complete AMS.

Step 23 – Client to complete CCFG

Case owner to discuss with the client to complete CCFG and ask the client to review the FGs. Once validated client to commit the FGs.

Step 24 – Data Verification & Decision Review and Alert action

Case owner to inform client to Run Internal Data Verification and forecast/decisions review post BDE optimization. Also, Action alert for the same in G3.

Step 25 – Post Data Collection_Data Verificaton_Decision Review

ROA to execute this step/task.

Step 26 – Decision Upload Confirmation

Case owner to reconfirm first upload post the migration to the new PMS. Full upload will be required and case owner to assign this task including format of decisions to ICS when ready.

Step 27 – Review Outbound

ICS to review outbound and carry out necessary changes, if required like change in DailyBAR rate code (This to be updated by Case owner prior to decision upload)

Step 28 – Peer Review

ICS (senior team member) to complete peer review and setup property to be ready for 2-way.

Step 29 – Upload Decisions and send confirmation

ICS to upload decisions like other 1st DU process and send confirmation to the client or case owner accordingly.

Step 30 – Action Pending Migration Alerts – If any

ICS to review pending migration alerts present in UI and action if needed.

Step 31 – Monitor G3 RMS Processing and Decision Upload

ICS to monitor the property’s processing and decision upload for next 2 days.

Step 32 – Delete property code from NGI Vendor config

ICS to remove the OXI configuration for the property from NGI. Step 15 should be worked upon, and no messages should be received in NGI.

Installation

Property Client Vendor Opera Agent IDG Agent PMS Migration MS Recoding Hilton CP Migration Agile Product Import

Add Vendor

Total Records:66

Inbound Vendor ID	Inbound Username	Inbound Password	Outbound Username	Outbound Password	Integration Type	Past Days	Future Days	Parameter Form	Actions
▼ Client: ACCORHG	user	password							   
Property: 0288							560		 
Property: 0482							560		 
Property: 0492						46	560		 

Not applicable to Agent-to-Agent Migration

Step 33 – SPM Monitoring

ICS to inform SPM on completion of migration and SPM to monitor the property on Special care for next 5 days. Inform to case owner in case of any issue.
