1. Navigate to Configure > Decision > Pricing Configuration.

2. Check seasons under the Offsets Tab.

3. Verify if two or more seasons have overlapping dates. For example, in this case, season “June 2025” is configured from 01 June 2025 to 08 June 2025 and “Summer 2025” is configured from 29 May 2025 to 19 June 2025

As a result, the date range from 01 June to 08 June 2025 (7 days) overlaps in both seasons, leading to the issue.

Seasons		
+		
Name	Date	
June 2025	01-Jun-2025 to 08-Jun-2025 (Days: 8)	 
Summer 2025	29-May-2025 to 19-Jun-2025 (Days: 22)	 
20-26 June 2025	20-Jun-2025 to 26-Jun-2025 (Days: 7)	 
Summer 2025-Copy-2025-06-27	27-Jun-2025 to 31-Aug-2025 (Days: 66)	 

4. Take the necessary screenshot and report the issue to the GRO Support.

Subject Line: HLTN/<Property Code> – GRO – Force Sync Failure – Overlapping
Seasons – <Date> <Month> <Year>

Hello GRO Support,

Greetings from IDEaS!

We would like to bring to your attention a force sync processing issue for the
property below:

Property Code: <Property Code>
Property Name: <Property Name>

Upon investigation, we found that the failure is occurring due to overlapping seasons
—“<Season Name1>” and “<Season Name2>”—under the Pricing Configuration >
Offsets screen.

- “<Season Name 1>” is configured from <Date Range>
- “<Season Name 2>” is configured from <Date Range>

As a result, the date range from <Overlapping Date Range> (<Total overlapping
days>) is overlapping in both seasons, which is leading to the issue.

Could you please review and delete the overlapping dates to resolve the issue?

If you have any questions or require further clarification, please feel free to reach out.

Thank you for your prompt attention to this matter.

The following are our contact details:
