HLTN/ Troubleshooting “AccomType () does not have a default cost of walk set” Error

This document outlines the steps to troubleshoot the following error:

AccomType () does not have a default cost of walk set

This error indicates that a specific Room Type in the system does not have a default “Cost of Walk” value defined. This value is crucial for certain processes and needs to be set to avoid failures.

Troubleshooting Steps:

1. Identify the Room Type:

- Use the Care_validation query to find the Accom Type ID associated with the error.
- In the query results, locate the corresponding Accom Type Name using the Accom Type ID.

2. In G3, navigate to Room Configuration:

- In the G3 tool, go to Configure > Inventory > Room Configuration.
- Click Next to access the “Cost of Walk” screen.

3. Verify the Cost of Walk:

- Locate the Room Type identified in Step 1.
- Confirm that the “Cost of Walk” field is not defined for this Room Type.

Action Item:

- **Notify the client:** Inform the client about the issue and request that they update the “Cost of Walk” for the specific Room Type.
- **Use the following email template:**

Email Template

Subject: <Chain Code>/<Property Code> – GRO – Processing Failure – Missing Cost of walk values – <Date> <Month> <Year>

Hello GRO Support,

Greetings from IDeaS!

We wanted to bring to your attention that there is a processing failure for the property below:

Property Code: <>

Property Name: <>

On further investigation, we found that for the Room Type <insert name> the default cost of the walk is not updated, causing the processing failure.

We request you update the default cost of walk from the Rooms Configuration screen.

If you have any questions or concerns, please do not hesitate to email us at CARE@ideas.com.

Thanks and Regards,
[Your Name]

Note: You need to abandon the failure so that they can take action on this.
