HLTN/Critical Jobs Monitoring Action – Connection Timeout or Overdue

CRSFileArrivedMonitor

Frequency: Runs every 180 minutes.

Introduction: This job detects and processes new or updated Central Reservation System (CRS) files.

Actions:

- **If connection time out Job Failure:**
 1. Resume the job 2-3 times.
 2. If the job continues to fail after resuming, abandon it and monitor.
 3. If subsequent runs of the job also fail, resume 2-3 times and abandon if failures persist.
 4. If the pattern of repeated failures continues 2 times, post an alert on the On-Call channel.
- **Job Overdue:**
 1. Stop and resume the job once. Monitor closely.
 2. If the job comes in overdue again, abandon it immediately and wait for the next scheduled run.
 3. If the issue persists and the job becomes overdue again, report it on the On-Call channel.

Scheduled NGI Data Extract Job

Frequency: Runs every 15 minutes.

Introduction: This job retrieves a list of properties and determines whether to trigger processing for each property.

Actions:

- **If connection time out Job Failure:**
 1. Resume the job only once if it fails.
 2. **DO NOT** resume the job again if it fails after the first resume attempt. Abandon it, since the frequent schedule (every 15 minutes) ensures that the next run will occur shortly.
 3. If it fails again post it on the G3 On Call channel
- **Job Overdue:**
 1. If the job is overdue, **DO NOT** attempt to stop and resume it.
 2. **DO NOT** abandon the job, wait for the job to complete.
 3. If there is concern, that the job is running for a long time, then the thing to do is first raise this as a concern on G3 ON Call Rotation Channel.

Important Notes:

- This document provides general guidelines for handling job failures and overdues. Use your best judgment and escalate issues as needed.
- When reporting an issue on the On-Call channel, please provide as much detail as possible, including job names, error messages, and timestamps.
- This document should be reviewed and updated periodically to reflect any changes in job schedules or troubleshooting procedures.
