HLTN/Mass Scheduled Report Failures

Introduction:

This document illustrates the investigation and escalation steps for the Scheduled Report mass failures

Issue description:

We encounter multiple Schedule Report failure with the below error-

=====

Error Description: Error while uploading file to SFTP Server Error Message:
java.net.ConnectException: Connection refused (Connection refused)

=====

Signs:

Multiple Scheduled Report Jobs failing in the dataExtractionScheduledReportStep or any other step.

Basic troubleshooting steps:

1. Open the data dog link- [Scheduled Report failures](#)
2. Enter the time frame in which you want to search the logs. E.g. Past 1 hr, or 1 day etc.

[HLTN/Handling Error for SAS Dataset Encoding Job](#)

3. Once you enter the time frame the result is displayed, it will look like below

4. Now download the data as a CSV file by clicking on Download as CSV.

5. Once the CSV file is downloaded, open the file and keep the columns “Client Code” “Property Code” “FTP DESTINATION” and “REPORT TYPE”

Use the below template and escalate this to the client.

*****EMAIL TEMPLATE*****

Hello GRO Team,

We want to inform you about an ongoing issue we are encountering while uploading the Scheduled Reports for the properties listed in the attachment.

The error we’re currently facing is outlined below:

=====
 Connection timed out: connect
 =====

This error indicates that the connection to the SFTP is being terminated during the upload of Scheduled Reports for the impacted properties.

As an example, the connection is failing for the property <Property Code>. Our attempt is to upload the report named “<Report Name>” to the SFTP location <IP address/location name>, and this report is scheduled by the user <Username>.

Could you please investigate and update us if there are any issues with this specific SFTP location?

Note that once the issue is resolved, you have the option to manually request the reports from the UI by clicking on “Send”.

We are eagerly awaiting your response.

[Your Signature]

6. Once the client has been informed Continue the Failure.
The same property might fail again for another report as the client may have created multiple reports. Continue the Failure till it is completed.

👍 +4
