Cause of the issue :

When an evaluation request is received with an inactive user as the owner, the evaluation proceeds successfully in G3. However, when the results are sent back to Delphi, they are rejected because the user is inactive in their system.

Resolution Steps :

1. Notify GRO Support with the relevant user and task details.
2. Once GRO confirms the resolution, monitor the subsequent executions of the "NGI Process Evaluation Results" job to ensure successful completion.

EMAIL TEMPLATE :

Subject Line: HLTN/<Property_Code> – GRO – Amadeus Data Processing issue – <Date>

Hello GRO Support,

Greetings from IDEaS!

We would like to bring to your attention the Amadeus data processing failure for the below Property:

Property Code: <Property_Code>

Property Name: <Property_Name>

=====Error=====

<Error Details>

=====

Below are the details of the Group.

Booking Id: <Booking_ID>

Group Name: <Group_Name>

Arrival Date: <Arrival_Date>

Departure Date: <Departure_Date>

The error is observed while we try to send data for a group that an inactive user in Delphi owns.

Could you please review the records currently assigned to inactive users and reassign them to an active user as appropriate?

Also, could you connect with Amadeus to help get this resolved?

If you have any questions or require further clarification, please feel free to reach out.

Thank you for your prompt attention to this matter.
