HYI/Weekly Intervention Analysis activity

Hello Team,

This document will guide you through the activity of Weekly Intervention Analysis. This activity aims to identify and analyze the interventions we have notified the client (HYATT) about via email. It is a manual activity dependent on the Intervention sheet maintained by the Hyatt monitoring team.

This activity is performed weekly. The Hyatt monitoring team maintains data on all exceptions notified to the client. Each Monday, this data is reviewed and built into a Power BI report, which is then sent to stakeholders via email.

The Excel sheet is saved in the Hyatt Data folder in Teams, as shown in the screenshot below.

From the screenshot, you can see the highlighted columns, which are essential and should not be altered.

- **Column A:** Date (current date)
- **Column B:** Chain – Hyatt
- **Column C:** Property code and name (ensure there is a space between the hyphen in the property code and name, e.g., <property code> - <property name>)
- **Column D:** Property code
- **Column E:** Issues listed in a dropdown (select the appropriate ones)
- **Column F:** Outbound (applicable only in case of decision issues; otherwise, it is always NA)
- **Column G:** Error (Type of intervention)

The list of categories is detailed in the ‘categories’ tab, indicating what needs to be selected for each type of issue.

- **Column H:** Additional information regarding the issue (details of the error)
- **Column I:** Impacted optimization
- **Column J:** Issue Ownership (who is responsible for the issue)
- **Column K:** Category (same as Column J)
- **Column L:** Root Cause (cause of the issue)
- **Column M:** Fixed By (who fixed the issue, if resolved)
- **Column N:** Status (current status of the issue)
- **Column O:** Team Link (for internal escalations via Teams channel or chat)
- **Column P:** Comment (status of the issue, either resolved or pending)
