Handling TARS Decision Acknowledgement Issue

1] If we have multiple **NGI TARS Decision Delivery Job** jobs in the overdue section running for a long time, Run the **G3Support-TARS-Sftp-Out-File-List** build from **Jenkins** and check whether we are receiving the ack/err files.

3] If not, then on postman **GET** the following:
<http://us2pngiap01.ideasprod.int:9091/health>

4] In the output check if the Poller **TarsDecisionProcessStatusPollerJobGroup** is in Running state.

5] If the **TarsDecisionProcessStatusPollerJobGroup** Poller is in **Running State** then the issue is on the client side. You may go ahead and notify the TARS Team regarding this.

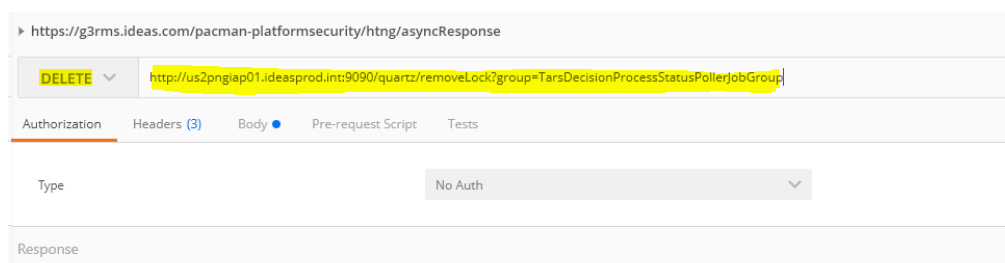

CONTACTS

To: [Refer Accor CT form](#)

CC: [Refer AccorCT form](#)

6] If the **TarsDecisionProcessStatusPollerJobGroup** Poller is in **Locked** state, then make the following call with the above Job Group with **HTTP** method as **DELETE** from Postman

[http://us2pngiap01.ideasprod.int:9090/quartz/removeLock?](http://us2pngiap01.ideasprod.int:9090/quartz/removeLock?group=TarsDecisionProcessStatusPollerJobGroup)
group=TarsDecisionProcessStatusPollerJobGroup

7] Now, follow the step number 4 to reconfirm whether the Poller is in the Running State.
