Hilton/NGI Hilton Decision Delivery Job Failures

This document guides you on how to address decision upload failures for HILTON in job “NGI Hilton Decision Delivery Job”.

Scenario 1]

If “NGI Hilton Decision Delivery Job” job is failed in step “NGIHiltonFplosDeliveryCompletedChunkedStep” with below error:

=====

Error: javax.ejb.EJBTransactionRolledbackException: Duplicate key <ID> Cause : java.lang.IllegalStateException: Duplicate key <ID>

=====

Please follow the below steps to resolve:

- 1) Go to G3 CMA >> SQL
- 2) Search for query “*LinkedSRP: Update Rate Qualified table status Id 2 for same rate code twice as fixed and % or value*”.
- 3) Select Prod_1.
- 4) Select Hilton/HiltonTest

- [Processing Failures Due to Data Type Mismatch for MGM Resorts](#)
- [Dynamic Optimization](#)
- [HLTN/Handling Error for SAS Dataset Encoding Job](#)

5) Select failed property.

6) Run this script.

7) Resume the failed job.

Scenario 2]

If “NGI Hilton Decision Delivery Job” job is failed in step
“NGIHiltonFplosRequestDeliveryStep” with below error:

=====

Error: Failed to send the decisions : javax.ws.rs.ProcessingException: Error sending
Outbound Event 400{"context": "TOPICS", "code": 997, "message": "Bad
Request", "notifications": [{"code": "32", "fields":
["recommendations.3.lengthOfStayPattern"], "message": "JSON Parse Error"}]}

=====

Please follow the below steps to resolve:

1) Go to G3 CMA >> SQL

2) Search for query “**LinkedSRP: Update Rate Qualified table status Id 2 for same rate
code twice as fixed and % or value**” script

3) Select Prod_1.

4) Select Hilton/HiltonTest

5) Select failed property.

6) Run this script.

7) Abandon the failed decision delivery job and reprocess the extract.

Please note, if any subsequent extract is in the queue, first abandon all such extract
and then catch up the property from the failed extract (you may use do so from
Installation -> Process Data).

Note: Resuming the failed job after executing the query won’t work here as duplicate
decisions were already generated. Hence for this failure, you will have to reprocess
the extract as mentioned above.

Please do not deviate from this process and if you see any failure apart from the
above-mentioned scenarios then follow the usual escalation process.

For any doubt, please liaise with TLs/SEs.
