Hilton/NGI Hilton Decision Delivery Job – How to check if response is received from Hilton side.

This document will help us to understand if we are receiving response from Hilton side while we upload decisions via NGI Hilton Decision Delivery Job.

When you see a long running **NGI Hilton Decision Delivery Job** on Prod1 then do not stop resume it.

Instead use the below link of data dog to verify if we are receiving the response from Hilton side. (Note – Please change the property code)

https://ideas.datadoghq.com/logs?cols=core_host%2Ccore_service&event&from_ts=1611843361316&index=&live=true&messageDisplay=inline&query=Received+response+for+Property+Code+SANQQ&stream_sort=desc&to_ts=1611929761316

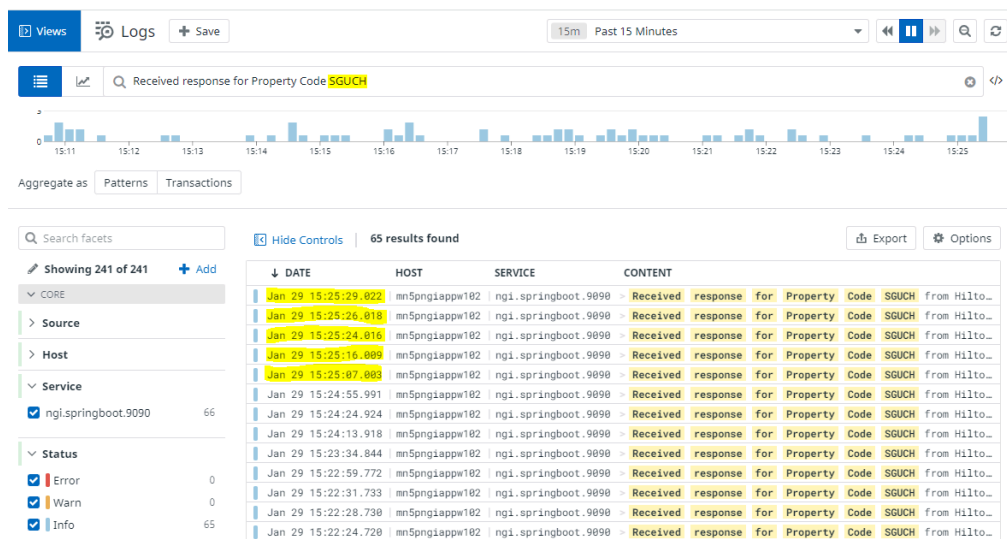

You will see the below screen.

See the highlighted part if you see the time is changing that means we are receiving response from Hilton side.

If you see the time is not updating (that means we are not receiving the response) for 10 minutes stop resume the job.

Even though you see the time is not updating then please highlight this on “G3 On Call” teams channel (DO NOT PING ANY QA MEMBER ON PERSONAL CHAT).

Before escalating to QA or on G3 On Call refer with your TL or SC.

NOTE – Please DO NOT STOP RESUME without carrying out the above process.

Please do not deviate from this process.
