Hilton/Processing Failure – Currency Change

This document illustrates to handle the processing failures observed for –

Job Name – Process CRS Extract BDE/Process CRS Extract CDP
Step name – ratchetStep

Problem Description – Unable to determine problem, please see logs for details

Solution :

1. Download and Open the logs from the failed step

ratchetStep			
populateChannelRestrictionStep			
syncChannelRestrictionAdjustmentStep			
channelRestrictionAdjustmentCurrencyCorrectionStep			

2. From the Validation error log you will find the error “*ERROR:More than one distinct PropCurrency found in Hotel table.Program Will TERMINATE,71194d36-103b-45ca-b494-82fa2fa5f171*”

```

The error indicated that we had received a different currency than the one configured on our side.

3. Go to the Support > Configuration > Enter Property Details and check for parameter “*ratchet.yieldCurrencyCode*”

4. Note down the configured currency on our side. In this case, it is “USD”
5. Download the failed extract from the failed job.

6. Upload the downloaded extract and open the .snap file in excel

7. Do Text to Columns in Excel.

8. Insert the Snap header for the hotel record structure, and Filter the “PropCurr” Column and you find the received currency at the hotel level.
[Snap_Hotel record header](#)

9. As we see here, we have received the currency as “NPR” causing the processing failure.

10. Please check with the client whether they have changed currency at their end. If so, let us know as we will have to make certain changes to the system from the backend. If not, then we should ask the client to send an extract with the correct currency information. Please attached the extract for reference.

EMAIL TEMPLATE :

Hello GRO Support,

This is to inform you that we are facing a processing issue for the below property –

Property Code: <Property_Code>

Property Name: <Property_Name>

It appears that we’ve received the currency “<received currency>” in the <failed extract name> file at the hotel level. Our configured currency is <configured currency>.

Could you kindly confirm if there has been a change in the currency?

If there has been a change, we’ll need to implement certain backend adjustments.

If not, could you please provide the extract with the correct currency information?

For your reference, I’ve attached both the failed extract.

ACTION ON FAILURE :

- 1. Abandon the failure.
- 2. If there has been change in currency, loop in Rohit and open a case to implement certain backend adjustments.
 - 2.1 Ask for full-push after implementing the changes in the backend if BDE for more than 1 day is skipped.
- 3. If there is no change in currency and the BDE is not processed for more than 1 day, ask for Full push once the corrected currency is provided in the extract.
