Hilton/Processing Failure – non positive offset value for Product

This document illustrates to handle the processing failures observed for –

Client Name : Hilton
Job Name : NGI CDP Deferred Delivery Job/ NGI Deferred Delivery Job
Step Name : CDPOptimizationServiceStep

ERROR –

Error:non positive offset value 0.000000 is found for product with id of 54 on season -1 to -1. :

Error:Error when reading from input tableTable name:Vw_Product_Rate_Offset_With_Tax
SQL query: select v.product_id, v.accom_class_id,v.Agile_Rates_DTA_Range_id, v.start_date, v.end_date, v.offset_method,v.sunday_offset_value_floor,v.sunday_offset_value_ceil,v.monday_offset_value_floor,v.monday_offset_value_ceil, v.tuesday_offset_value_floor,v.tuesday_offset_value_ceil, v.wednesday_offset_value_floor,v.wednesday_offset_value_ceil,v.thursday_offset_value_floor,v.thursday_offset_value_ceil,v.friday_offset_value_floor,v.friday_offset_value_ceil,v.saturday_offset_value_floor,v.saturday_offset_value_ceil from Vw_Product_Rate_Offset_With_Tax as v,Product as p where v.Product_ID = p.Product_ID and p.Product_Code_ID != 3 order by v.Product_ID, v.Accom_Class_ID, v.Agile_Rates_DTA_Range_id, v.offset_method, v.start_date, v.end_date

As the error specifies there’s a non-positive value found for the product. This non-positive value can be zero or any negative number. In this case, it is zero.

Ranjit on Hilton/Processing Failure – non positive offset value for Product

Ranjit on Service Recovery Procedure – IDEaSOperaAgent Service in “Stopping” State

Ranjit on Processing Failures Due to Data Type Mismatch for MGM Resorts

Ranjit on Accor Client Handling Process Guide

Navigate to Configure > Forecast > Market Segments > Search for Product Name >
Click on the checkbox as shown below –

To inactivate the product, the system must be unlocked from the problem(unlock the padlock)

2. Disable “pacman.feature.HiltonRateProtectAutomationEnabled”

Navigate to Support> Configuration > Select property on the property level screen.

Set “pacman.feature.HiltonRateProtectAutomationEnabled” to false and save.

3. Resume the Failure.

4. In case the job further fails with below error :

Error:Error when reading from input tableTable name: product_weight_lowest SQL query: select
PRODUCT_ID,OCCTYPE_ANALYTICS_ID,CHANNEL_GROUP_ID,ACCOM_TYPE_ID,
FORECAST_GROUP_ID,MONTH,DOW,LOS_GRP_NUM,DTA_RANGE_ID,WEIGHT
from Product_Weight_Lowest order by
PRODUCT_ID,OCCTYPE_ANALYTICS_ID,CHANNEL_GROUP_ID,ACCOM_TYPE_ID,
FORECAST_GROUP_ID , month, dow, los_grp_num, dta_range_id

Follow below steps:

4.1 Abandon the current failure.

4.2 Enable the special event sync

4.3 Run the Sync

4.4 On successful completion of sync, reprocess the abandoned processing.

5. Once everything mentioned above is done. **With all the details, please escalate the issue to the SPM L2 team via SFDC task to verify and check the data conditions for this. Do not notify the client at this point.** The SPM L2 team verifies the data condition and resolves the issue if it is on the IDEaS side.

6. Once the SPM L2 verifies the data condition and if found that the issue is on the client side, escalate the issue to the client on the SPM L2 team’s confirmation. The email template has been shared for your reference.

7. Once the configurations are corrected and we receive confirmation from the client, enable "Pacman.feature.HiltonRateProtectAutomationEnabled"

Navigate to Support > Configuration > Select property on the property level screen. Set "pacman.feature.HiltonRateProtectAutomationEnabled" to True and save.

8. Hit the below rest call to trigger the Rate Protect Automation Job. Change the <Property_ID> as per property.

http://mn5pg3xappl108.ideasprod.int:8080/job-web/?
jobName=HiltonRateProtectAutomationJob&propertyId=
<Property_ID>×tamp=218

Example: http://mn5pg3xappl108.ideasprod.int:8080/job-web/?
jobName=HiltonRateProtectAutomationJob&propertyId=003665×tamp=218

8. Once the job is completed, verify the Rate Protect tab for the affected product earlier. On successful completion of the process and positive values under Rate Protect send the closure on the email sent.

SUMMARY:

1. Issue observed > Investigate.
2. Push the processing.
3. Escalate to the SPM L2 team. Do not notify the client.
 1. SPM L2 team verifies the data condition.
 2. If the Issue at IDeaS side > SPM L2 fixes it.
 3. If issue on the Client's Side > Notify the client on SPM L2 confirmation.
 1. Once configurations are corrected – follow steps 6 to 8.

*****Email Template

Email Subject: HLTN/<Property Code>- GRO – Processing Failure – SRP incorrect setup or Rate Protect – <Date> <Month> <Year>

Email Body :

Hello GRO Support,

Greetings from IDeaS!

This is to inform you of a <BDE/IDP1/IDP2,...> processing issue affecting for the below property:

Property Code: <Property Code>

Property Name: <Property Name>

Upon investigation, we have identified the values under the 'Market Segment' section, specifically in the 'Rate Protect' tab, for the product '<Product name>'.

The price has been set to <zero/negative value>, causing an error during processing.

Kindly investigate this issue promptly and provide us with an update at your earliest convenience. Currently, we have inactivated the SRP to allow daily processing for the property.

Thank you for your swift attention to this matter
