How To resolve Opera Data Load job failure for Duplicate key issue

Hello Team,

If you observe a failure with Opera Data Load job with the error as below;

Problem Description

TetrIs Errors: [34 - DATABASE_EXCEPTION - javax.ejb.EJBTransactionRolledbackException: org.hibernate.exception.ConstraintViolationException: could not execute statement - User.id: null - Workcontext: null] Cause : javax.ejb.EJBTransactionRolledbackException: org.hibernate.exception.ConstraintViolationException: could not execute statement Cause : javax.persistence.PersistenceException: org.hibernate.exception.ConstraintViolationException: could not execute statement Cause : org.hibernate.exception.ConstraintViolationException: could not execute statement Cause : com.microsoft.sqlserver.jdbc.SQLServerException: Cannot insert duplicate key row in object 'dbo.Individual_Trans_Table' with unique index 'UQ_Individual_Trans'. The duplicate key value is (1553992, 10828, 2018-07-11).

In the above Error, the value highlighted in yellow is ‘Reservation Name ID’. It will help you find the **Confirmation number**.

Once you have the confirmation number, run the following query from G3 CMA;

‘Check the problematic reservation for Duplicate key issue in stage table’

Along with the above mentioned 2 parameters, please ensure you update the past days parameter to 45 days (parameter name: pacman.integration.opera.pastDays) before re triggering the new feed
NOTE: DON'T REVERT PAST DAYS VALUE TO ORIGINAL VALUE. PLEASE KEEP IT AS 45 DAYS
