How to calculate or convert a SAS date

Enter the SAS date you want to check in an Excel Cell

Say for example the number is 23114 in the example below.

In a cell – enter these values =cell number (like D3)+**21916**

Change the format to Short date and you’d get the date under consideration.

In the case above – the date would show as 14-04-2023

Font					
=D3+21916					
B	C	D	E	F	
		23114		14-04-2023
