How to convert G3 SAS Date and Time into standard dates?

In the G3 job logs, you may find dates like the following: (Note that this is a sample of a failed Group Evaluation job, so the actual name of the date may differ depending on the job that you are checking)

Res start date: 21182

Res end date: 21741

Opt start date: 21182

Opt end date: 21741

The formula for converting these dates is :

Date = SAS Date +21916

Open excel and put in the SAS date in the first cell and apply the above formula in the second cell and change the formatting to Date:

B1					
	A	B	C	D	E
1	21182	12/29/2017			
2	21741	7/11/2019			

If you see a date **and** time in the logs, the formula is different:

SAS DATE and TIME/86400 + 21916

We don't have an example for this right now, however this format is mostly recorded in the tenant tables.
