How to detect if a G3 Property is AMS or Not?

How to detect if a Property is AMS or Not?

- Select the correct client/Chain
- Select the correct property
- Go to Configure
- Go to Attribute Market Segment
- Observe the pane on the right hand side . It should have a list of attributed Market segments.

- This is the list only.
- Go to Support > Configuration > Property Tab. Select correct property under property tab. Refer screenshot below :

- search for a parameter by the name : **pacman.feature.AnalyticalMarketSegmentEnabled**
 - If parameter is set to **true** – Property is an AMS property.
 - If parameter is set to False – Property is a straight in MS property.
- Here's a [link](#) that illustrates the overview of AMS from a client perspective

Here's a link that gives a broad overview to [Considerations for Configuring Analytical Market Segments](#) (AMS) Through Attribute Market Segments in G3 RMS.

How to check if AMS is completed?

- Ensure mapping is completed as shown above
- Go to Support > Configuration > Property Tab. Select correct property under property tab. Refer screenshot below :

The parameter **pacman.population.analyticalMarketSegmentMappingComplete** should be set to true.

- This would indicate that the AMS is completed.
