How to search which rate shopping file was processed last in G3?

How to search which rate shopping file was processed last in G3?

- Login to the correct node : Prod1 (for Hilton properties) or Prod 2 (ESA & GA) properties
- A good check to check the Important Information page on the site . Note : This 'does' not mean the file you're looking for is the one that processed. A conclusive check is listed in the next section
 - Select the correct property
 - Click on the little icon that 'reads'/ looks like the small case letter i.
 - This brings out the Important information page .
 - If the property subscribes to rate shopping – and a rate shopping file was processed – then the Web rate processed filed on this page would show the date and time of this process completion.

- Determining the Rate Shopping file that was processed by the G3 site can done using steps below :
 - Go to Support > Monitoring Dashboard

- Under Monitoring Dashboards > Jobs > select the icon that looks like a filter.

- Once you click the filter you should see a blank screen with multiple options to select from – so please select all the correct details for the property that you’re trying to identify as having had processed the rate shopping file. Refer screenshot below :

. You must select the correct Chain > Property name . Select all the stages , system mode and under the job section (7 on the image) select Process Web Rate Extract and Web Rate Catchup by simply typing Web into the ‘filter job’ dropdown. . Make sure you select the ‘correct’ start date and an end date. If you’re looking for data in past 2 days – then you can skip entering the end date and then hit apply.

- The G3 system will now return list of Web extract processes that it completed for the property , for the selected date range , from the previous step. You can click on the magnifying glass to see details of

which files were processed and get greater details of the process.

- Check the execution steps screen to see the list of all the processes that the site undertook. most of the steps would typically be completed. Like below
- If you click on the Execution parameter you will see greater inputs like the name of the Rate shopping file that processed.
- If you want to have a look at the actual file -you can go to the next screen which is Execution Context. Under the archived Web rate extract you will see the file name and if you simply click on the hyperlinked 'file name' you will see a popup of the file with an option to download.

You can then use this to look at what raw data is being sent.
