IDEaS G3-RMS Inventory Group Module

Enable Inventory Group Module

- When client requests to have the inventory group module, then following parameter needs to be configured.

1. businessviews.EnableMergedBusinessView should SET to TRUE

1. businessviews.InventoryGroupsEnabled should SET TO TRUE

What is inventory group?

Inventory Groups Configuration

G3 RMS displays on dashboards is at the property level and includes the totals of all Room Classes. If you manage a property with mixed inventory, like Tower1 and

Tower2, you may want to see performance data only for Room Classes that contain one type of [inventory](#).

[Inventory](#) Groups is an feature that allows you to [group](#) Room Classes in order to view that [group](#)'s performance data separately on dashboards. Each [Inventory Group](#) that you configure contains one or more Room Classes. The [Inventory](#) Groups then display as a filter option on the Business Analysis dashboard, the At a Glance dashboard, and [Demand](#) and [Wash](#) Management.

Base Room Type

For each [Inventory Group](#), you also select a Base [Room Class](#). Similar to a Master Class, the decision for the Base [Room Class](#) is the one that displays in fields where only a single decision can display. For example, when you filter by an [Inventory Group](#) on the Summary tab of the Business Analysis dashboard, the LRV decision that displays in the table is for the Base [Room Class](#) of that [Inventory Group](#).

Inventory Group Filters

Filters for [Inventory](#) Groups are available in the following locations:

- [Business Analysis Dashboard](#)
- [At a Glance Dashboard](#)
- [Demand and Wash Management](#)

Add Inventory Groups

Create [Inventory](#) Groups that contain subsets of your Rooms Classes. You do not need to create an [Inventory Group](#) with all Room Classes since [Inventory Group](#) filters have a “Property” view option.

Inventory Group

This filter only applies for properties that use the [Inventory Groups](#) module.

Select an [Inventory Group](#) filter if you want to see performance data only for the Room Classes in that [Inventory Group](#). The “Property” option is the default view and includes data at the property level for all Room Classes.

Inventory Groups for At a Glance/BAD/Demand and Wash screen

This filter only applies for properties that use the [Inventory Groups](#) module.

Select an [Inventory Group](#) filter if you want to see performance data only for the Room Classes in that [Inventory Group](#). The filter applies to all panels in the dashboard. The “Property” option is the default view and includes data at the property level for all Room Classes.
