IDEaS G3-RMS Room Type Offset module

Enable RT Offset to external users

NON HILTON USERS

- External users can view RT offset screen (Configure -> Room Type Offset) only when
 - feature.DailyBarConfigurationEnabled is set to TRUE.

Current Global Settings:

- bar.barDecision = RateofTheDay.
- feature.isContinuousPricingEnabled = False.
- feature.DailyBarConfigurationEnabled = True.

Above three settings are in sync.

- When we add new client or new property and we do not change (a) or (b), (c) does not need any change at respective levels.
- If we change parameter (a) above at client / property level to BarByLOS – we need to change parameter (c) (pacman.feature.dailybarconfigurationEnabled) to False. (There are exception when BARByLOS also uploads Daily bar. In such case no need to make it false.)

- If we change parameter **(b)** (feature.isContinuousPricingEnabled) to True at client/property level we need to make parameter **(c)** (pacman.feature.DailyBarConfigurationEnabled) to False at respective level.
