Identifying Summary Statistics Error – Zero Values Across All Dates

Applicable To: G2 and G3 – NGI/HTNG Properties

Categories

Select Category

Purpose

This document provides guidance for identifying and resolving the error:
“Amounts for all RevenueCategoryCodes and Summary Counts for all CountCategoryCodes cannot be zero for all dates.”

This error commonly causes summary statistics to appear as **INCOMPLETE** on the Installation screen and for G2 start from Step 1.

When to Use

If you encounter **Incomplete** status for summary statistics in the G3 tool, follow the steps outlined below to investigate and address the issue.

Step-by-Step Investigation Process

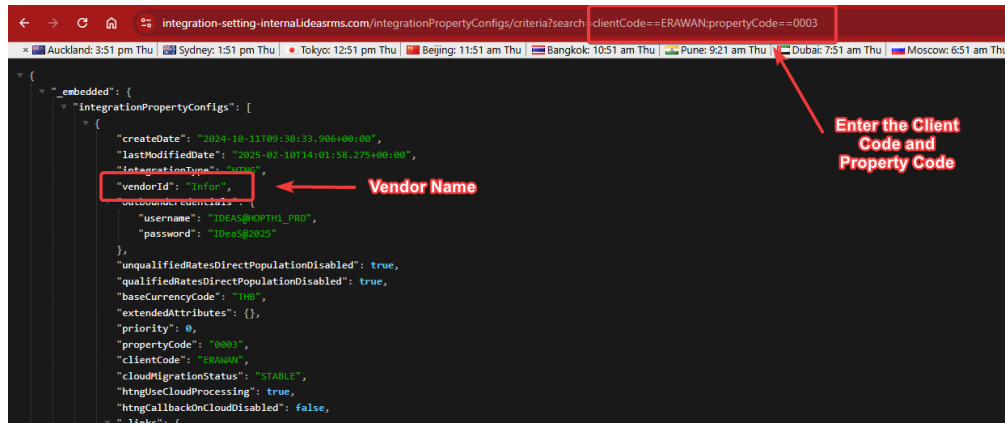

Step 1: Identify the Vendor Name

Use the Integration Property Configs tool to find the vendor associated with the property:

URL:

<https://integration-setting-internal.idearsms.com/integrationPropertyConfigs/criteria?search=clientCode==<ClientCode>;propertyCode==<PropertyCode>>

Replace **<ClientCode>** and **<PropertyCode>** with the actual values (e.g., ERAWAN and 0003).

Step 2: Use the HTNG Troubleshooter Tool

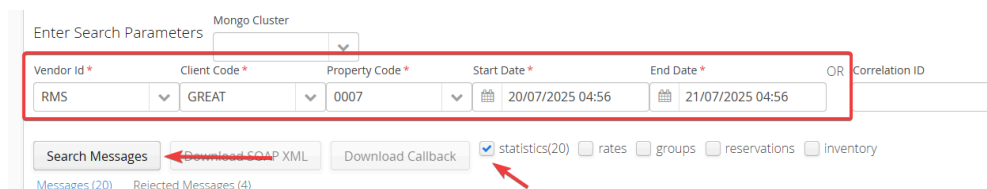

Once the vendor is identified, access the HTNG Troubleshooter to diagnose the summary statistics issue:

URL:

<https://htng-troubleshooter.idearsms.com/troubleshootV2/#!/Troubleshooting/tId%23null>

Instructions:

- Fill in all required fields: Vendor Name, Client Code, Property Code, Date Range
- Select **"Statistics"** from the troubleshooter options.

Step 3: Analyze the Error Type

Look for the following error under the Error Column in the statistics section:

"Amounts for all RevenueCategoryCodes and Summary Counts for all CountCategoryCodes cannot be zero for all dates."

This error indicates that the Amount value for Revenue Category Codes and Summary Count Value for Count Category Codes is set to zero for one or more dates.

Step 4: Verify in the STAT XML Message through Excel File

To verify the values, download the SOAP XML of the affected STAT message and examine it by opening it in excel format.

Key Detail to Identify:

- Look for the values under the column **Amount** for **RevenueCategoryCode** and **SummaryCount** for **CountCategoryCode**
- If the associated values for the respective CategoryCode is **0**, for all the dates in the file, this confirms the error.

Root Cause Explanation

- "**SummaryCount**" for the respective "**CountCategoryCode**" and the "**Amount**" for the respective "**RevenueCategoryCode**" cannot be "0" for **ALL DATES**.
- There should be at least one entry for RevenueCategoryCode and CountCategoryCode.
- A value of "0" for **ALL THE DATES** is invalid and leads the system to mark the statistics as **incomplete**.
- Prior to the error date, we received values for at least 1 day. The issue begins when this value for all dates changed to "0".
- To confirm the same, download the Summary Statistic of the previous date when the issue wasn't observed.
- Open the XML file in Excel and add filer.

Verify the Column "**Amount**" and "**SummaryCount**" for at least 1 entry in the file (refer below screenshots).

- This confirms that there should be at least 1 entry present in the file.

Client Communication Template

Subject: <Chain Code>/<Property Name> – IDeaS G3/G3 RMS – Invalid BDE/IDP
Summary Statistics Received – DD-MM-YYYY

Hello <Client Name>,

We would like to inform you that we are encountering an error in the <BDE/IDP> summary statistics for the property, which is currently preventing the system from processing data correctly.

Issue Summary:

The system has flagged the statistics as incomplete due to the following error in <ERROR STATS NAME>:

Amounts for all RevenueCategoryCodes and Summary Counts for all CountCategoryCodes cannot be zero for all dates.”

This error indicates that the **Amounts for RevenueCategoryCodes** and **Summary Count for CountCategoryCodes** are “0” for all the date in the Summary Statistic <STATS NAME>

For example, for (Message ID: <Available in troubleshooter>), we were receiving an entry until <SUCCESS DATE>, but starting from <ISSUE DATE>, the values for all dates changed to “0” which resulted to the error.

<SHARE THE SCREENSHOT WHERE VALUES ARE ZERO>

Action Required:

Please liaise with your vendor (**Vendor Name**) to:

- Correct the values of **RevenueCategoryCodes** and **CountCategoryCodes**.
- Re-push the summary statistics.

We have attached the relevant **SOAP XML logs** that indicate the exact dates and structure of the issue to help with your investigation.

Once repushed, kindly inform us so we can monitor processing the summary statistics.

Please reach out if you have any questions or need further assistance.

Best regards,

[Your Name]
