MGM Resorts Monitoring Process

MGM Resorts Monitoring Process

Introduction

This article outlines the notification/escalation process to be followed for MGM Resorts Las Vegas.

For General Monitoring process please refer to [this](#) article.

Monitoring Process

- Follow standard email communication in case of missing market code errors and include @Sandeep Gund in the communication (which is currently followed)
- Once details have been provided by Client, inform @Sandeep Gund on teams about the same.
- Consult with @Sandeep Gund on Teams for any action on failures to be taken.
- Never request an ad hoc pull in any circumstance.
- Pull jobs almost takes minimum of 2 hours.
- BDE overdue arrived time has been set accordingly by Sandeep
- Strict advice-Never stop resume any job for MGM
- If you observe ‘Opera Data Feed job’ (BDE or IDP’s) is not auto triggered in their scheduled time then follow below steps,[UPDATE ON 18 April 2021]
 - Find out Agent ID of the property (Go to Installation >> Search property >> Click on ‘Property Code’)
 - Go to Installation >> Opera Agent >> search for Agent ID >> Click Actions >> Request Logs.

3. Once we receive logs, verify if logs are getting updated with latest time stamp.
4. If Logs are getting updated,
 - a. **Yes** – Report on On call Channel tagging @Sandeep Gund. Mention all preliminary investigation performed.
 - b. **No** – Go to Installation >> Opera Agent >> search for Agent ID >> Click Actions >> 'Reset Remote Agent'. Once Reset Remote Agent completes, Opera Data Feed Job should auto trigger. If not then Report on On call Channel tagging @Sandeep Gund. Mention all preliminary investigation performed.

Note :- Do not add Ad hoc Request Feed in any circumstance unless it is advised.

GSE Decision upload Error specific Troubleshooting

Scenario 1 :- we receive empty message response while uploading decisions to GSE.

1. When job fails with **“Unable to determine problem”**, expand the failed job step and capture the response from **“RESPONSE_STRING”**

2. If the response body is empty (without success / warnings / errors) then try resuming it couple of times. If it fails again then escalate the issue to Vendor / client and abandon the job.

Below is an example of the empty body message:

```
<env:Body>
<OTA_HotelRatePlanNotifRS xmlns="" TimeStamp="2021-04-18T15:36:23.721Z"
Version="3.000"/>
</env:Body>
```

To view the message on the Datadog, please follow the below steps:

1. Once we click on the log Icon , we need to remove Error from the filter

2. Search for **“Handling an async callback for AsyncCallbackData”**

3. Capture the message from “responseString”

Below is the example from the datadog:

=====

```
Handling an async callback for AsyncCallbackData: AsyncCallbackData:
[jobExecutionId=14848103, stepExecutionId=157447317, wasSuccessful=false,
requestString=null, responseString=<env:Envelope

Version="3.000"/></env:Body></env:Envelope>, response=RESPONSE,
responseFileReferences=[]]
```

=====

Scenario 2 :- When upload fails with past start/end date. [Update on 12th May 2021]

1. When GSE upload fails with below error, do not send notification email to MGM for such specific past date failures.

Sample Error :

=====Agile Rates Decision Upload Failed for Rate Codes
[PACKAGE], Partner errors received [Partner errors for rate code PACKAGE:
[Start / End Date 2021-05-02 cannot be in past]]=====

2. **Reason:** GSE CRS date rolls at midnight and not when Opera date rolls. There might be an instance where a hotel revenue manager has made rate changes around 11:30pm and the sync finishes after midnight. Rates will get sync with next BDE which is scheduled to run in couple hours after such failure.
(Every notification opens new ticket at MGM side and there isn't much they can do and it fixes itself before they can action anything)

NOTE

- Do not share password or user authentication details strictly. This is because they are Casino properties and have a strict policy of not exposing the password to all users.
- Do not communicate internal errors messages with client. Keep the communication as clear as possible. Contact shift supervisor in case of any

confusion.

- During Opera system maintenance/outages which would happen for MGM occasionally, there are strict instructions from MGM to not pull any data from their systems. EPM/ERM will provide us with advance notification of it.

- For below set of properties, notifications emails need to send in any case – IDeaS' side or client-side issue. [UPDATE (August 25, 2020)]
 - New York New York
 - Bellagio
 - Excalibur
 - MGM Grand Las Vegas
- For Issues related to extraction, processing, or decision upload for the above properties,
 - ~~(for IDeaS side [Processing]) a notification needs to be sent if the delay caused crosses 2hrs time window~~
 - ~~(i.e if an 11 AM IDP fails in processing and it is not resolved even by 01 PM, then the CARE team should notify the client immediately.)~~
 - ~~The approved delay window is of 2 hrs. (i.e from the start of the processing)~~ [UPDATE: September 04, 2020, PT]
 - ~~Currently only Excalibur has IDP's enabled for it. Until further notice;~~
 - For All the properties which have IDP enabled; [UPDATE: September 10, 2020, PT]
 - Do not sent any processing delay notifications for IDP to the client
 - Inform Ann Koliba on priority. If she is not available, Abhishek Mandhare is to be contacted. [UPATE : August 17, 2022, PT]
 - Only Ann Koliba, Abhishek Mandhare (in Ann's absence), Alex, and IDeaS DEPT: ET needs to be informed in case of processing issues/delays exceeds more that 2 hours from the scheduled times
 - **i.e . for Bellagio Hotel & Casino, the IDP's are scheduled at 09:30, 14:30, and 18:30.**
 - **So, if for any or all of the optimizations, if it is about to cross 11:30, 16:30, and 20:30 respectively, Immediately notify the above contacts.**[UPDATE: – PT October 6, 2020]
 - They will decide if the client needs to be looped in further, or not. [UPDATE: September 07, 2020, PT]
- For the rest of properties (apart from above four), notifications only send if the issue is at client side.
- Once the issue is resolved (irrespective of the status of the QA escalation (if given)) Immediately send the closure email.
- Timely updates needs to be provided to the client while following up with the QA team for a swifter resolution. [UPATE : September 1, 2022, PT].
- In terms of timely update, we need to provide MGM with a specific timeline by when they will expect a response from us; be it a continuance, or a resolution update,
 - e.g: If we observe a processing issue, and we inform MGM that they should expect the next update by 8 AM next day, or in 9 hrs (**The timeframe here is at individual discretion, no agreed time interval is agreed here. It varies on case to case basis.**) then we need to ensure that we meet the agreed interval communicated by us.
 - [UPATE : September 1, 2022, PT]

IDP times for the following properties (IST time)

1) Bellagio Hotel & Casino

IDP1 – 10PM

IDP2 – 03AM

IDP3 – 07AM

2)Excalibur Hotel & Casino
IDP1 – 09:45 PM
IDP2 – 02:45 AM
IDP3 – 06:45 AM
3))MGM Grand Las Vegas
IDP1:9:30 pm
IDP2:2:30 AM
IDP3:6:30 am
4)New York New York Hotel & Casino
IDP1:9:45 pm
IDP2:2:45 am
IDP3:6:45 am
5)Aria Resort & Casino
IDP1:10:00 pm
IDP2:3:00 am
IDP3:7:00 am
6)Mandalay Bay
IDP1:9:30 pm
IDP2:2:30 am
IDP3:6:30 am
7)Luxor Hotel & Casino
IDP1:9:45 pm
IDP2:2:45 am
IDP3:6:45 am
