NCP & PRO-MO monitoring

Overview

This document describes step by step procedure to work on NCP for 48 hours – daily meeting (Not Currently Processing) and PRO-MO (Proactive – Monitoring) data sheets

Purpose

NCP: The purpose of this procedure is to monitor and action the properties which are not processed for last 48 hours. The objective is to track such properties and make sure that all parties involved with such a hotel are aware of this – if there are repeat issues due to challenges – then to highlight them to the respective CRM’s and PM’s.

PRO-MO: The purpose of this procedure is to monitor and action decision upload issue observed with G2 and G3 properties. If the issue is long pending then the cause for the issue and the action that is being taken on it, is updated in the PRO-MO sheet along with any escalations to CRM’s.

The data collected in the NCP and PRO-MO Sheets are helpful for the Shift Coordinators during their calls with clients and CRMs and are also used by Leads and Managers for daily meetings with Director of Service delivery
