Notification Process for Hilton

We are in the process of implementing changes aimed at enhancing our support for Hilton, making it faster, more efficient, and more effective.

As part of these updates, we are streamlining the notification process for Hilton-related issues. Specifically, for problems that are within IDeaS control and have been escalated internally, we will **no longer send delay notifications**. This will help reduce email traffic while ensuring that all issues are resolved without missing any closures.

Examples of issues that do not require delay notifications:

- MORSE – 6835.
- MORSE – 6793.
- Internal processing issues escalated within IDeaS.
- Defects with a known workaround from IDeaS.

If Hilton has concerns about a system not being updated for a particular property, they can reach out to us directly at care@ideas.com.

For issues where action is needed from Hilton, GRO Support Team, or NTT Data Team, we will continue to send notifications as before.

Examples of such issues include:

- Missing Room Type Alerts
- Market Segment Errors / SRP setup issues / Rate Protect issues
- Incomplete Ceiling/Floor configurations
- Incomplete Base Room Type configurations

- BDE inventory not received
- SFTP server connection issues
- Scheduled Report connection issues
- Any issue requiring Hilton's or GRO Support's assistance

Additionally, if there is a processing delay affecting **50+ properties** due to an IDEaS issue, we will send a consolidated email notification to inform all parties about the delay.
