OHIP Emulator Properties: Night Audit and Communication Issue Investigation Workflow

OHIP Emulator Workflow

Step 1: Check Business Date

1. Access the following URL: `ohip-emulator-internal.ideasrms.com/api/v1/operaMetaData/<ChainCode>/<PropertyCode>`.
2. Verify if the date has rolled over.

Step 2: If the Date is Rolled Over

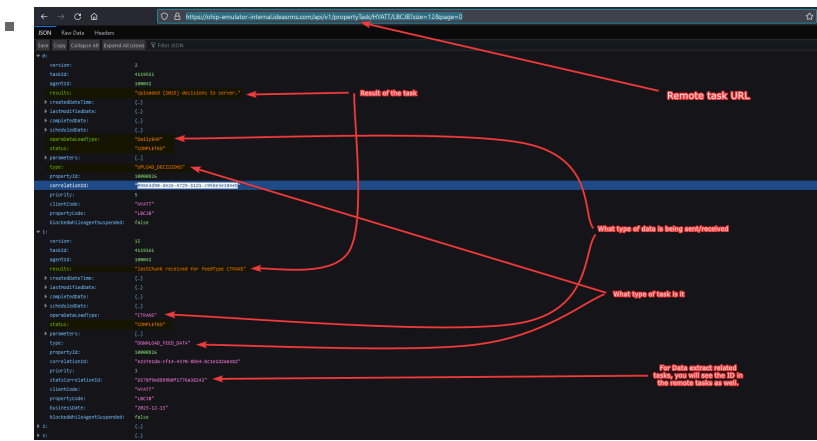

1. Check when the date was rolled over to understand the communication timing between the G3 system and PMS.
2. Access the Summary Statistics REST call for today's date to see if an ID is created with the status "Ready for pulling."
3. Copy the ID and search it in DataDog.
4. Correlate the time in DataDog with the current time to determine if the message was recently received or sent a long time ago.
 - If the time difference is more than 1 hour, there may be an issue.
5. Monitor if all statistics are getting created (6 of 6).
6. Check the remote tasks to ensure they are being executed:
 - Access: `ohip-emulator-internal.ideasrms.com/api/v1/propertyTask/<ChainCode>/<PropertyCode>?size=12&page=0`.

- If the task status is “Pending” for more than 30 minutes, check the communication between the Emulator and Agent.

Step 3: If the Date is Not Rolled Over

1. Identify potential communication issues:
 - Between OHIP and the Agent.
 - Between the Agent and Emulator.
2. Check if the agent heartbeat is receiving:
 - Go to the [URL](#) to identify the Agent of the impacted property.
 - Click on Properties and filter by property code.

-
- Go to the Opera Agent tab.
-

- If the agent has a grey heart, it is not communicating.
 - Identify the machine location:
 - **Hyatt DC:** Access Hyatt Grid (For Hyatt Properties).
 - **Oracle DC:** Ask the client to open a ticket with Oracle.
 - **Standalone Machine:** Send Still Alive messages.
 - If the agent has a red heart, it is actively communicating.
- 3. Add logs and check them to see if communication between the Agent and PMS is working fine.

Step 4: Check Communication Between Agent and PMS

1. From the downloaded logs, verify if the agent can communicate with PMS.
 - If the agent cannot communicate with PMS, contact the client to validate credentials.

Step 5: Property Did Not Complete the Night Audit

1. Add logs to check the business date returned.
 - If it is not the latest and the time printed in the logs is real-time, the client has not completed the Night Audit.
