For example –
There is OXI URL Maintenance for CRWEST URL of Radisson Chain.

Apply 2 filter to the Excel report which we have fetched as mentioned below.

Filter 1 – In **Client Code** select **CRHGROUP**

Filter 2 – In **Value** select the appropriate URL here the URL is

<https://crwestoxi01.microsdc.us/Operajserv/OXIServlets/PMSInterface>

By applying these filters you will get which all properties have the CRWEST URL – As shown below:-

Client	ClientCode	PropertyID	PropertyCode	Property Name	Parameter Name	Value	Property Overriding
141	CRHGROUP	991710	AKRO	AKRO Country Inn & Suites by Radisson, Anaheim, CA	pacman.integration.oxi.url	https://crwestoxi01.microsdc.us/Operajserv/OXIServlets/PMSInterface	Yes

Apply one more filter on **PropertyOverriding** and select the value “Yes”.

These filters give you the information about which properties are currently using the **CRWEST URL**.

List down the **PropertyCode** and Comma-separate it – you can use this online tool for comma-separation – <https://delim.co/#>
