When one physical room is sold which is also part of a component room then, the system makes entry in rooms sold for both room types.

It is important to understand the CR configuration of the property to be able to resolve the error.

The reason behind the failure :

There is a parameter in ROA tools ‘CRNegativeSoldHandling’ which is set to ‘-1’ by default for all properties.

The purpose of this parameter is to restrict the processing whenever we receive either negative room sold for any room type or there is a mismatch in the sold for a component room and its physical room type.

Different Scenarios with same error:

- Scenario1 – Negative room sold received in extracts from the client for a room type
- Scenario2 – Mismatch in sold for a component room and its physical room type

STEPS FOR INVESTIGATION:

1. Upon receiving a case for processing failure due to negative rooms sold, we shall check the component room configuration of the room type for which we have received the error.
Error: negative room sold for Occupancy_Dt: 23472 AT:14 MS:18 Error: Error when reading from input tableTable name: mkt_accom_inventory SQL query: (null)
2. Get the name of the accom type and market segment from CMA
3. In the below screenshot we can see that room type DWK is being used in two component rooms CDWKK & CDWKT.

CDWKK	3	DWK	98	2	1829 × 1828 × 1729 × 1728 × 926 × 927 × Enter Room Num: ▾
CDWKT	11	DWK	98	1	1621 × 1521 × 1421 × 821 × 1221 × 921 × 1121 × 1021 × 815 × 1815 × 915 × Enter Room Num: ▾
		DWT	42	1	1620 × 1520 × 820 × 1420 × 920 × 1220 × 1120 × 1020 × 814 × 914 × 1814 × Enter Room Num: ▾

4. Usually, the date mentioned in the error would be a future date, so from extracts we will open the file with future data i.e csat (current summary accom type) and check the number of rooms sold for all three room types DWK, CDWKK & CDWKT for the occupancy date mentioned in the error.
5. In the below screenshot we can see that for occupancy date 6th April 2024, there are no rooms sold for room type CDWKK & CDWKT. But for room type DWK, there is ‘-1’ rooms sold which led to the failure.

RESORT	OCCUPANCY_DATE	MARKET_CODE	PHYSICAL_ROOMS	OO_ROOMS	OS_ROOMS	ROOMS_SOLD	ROOM	ROOM_TYPE
KSL	04/06/2024	GCM	142	0	0	15	25216.8	DXK
KSL	04/06/2024	GCM	98	0	0	-1	0	DWK
KSL	04/06/2024	GCM	42	0	0	0	0	DWT
KSL	04/06/2024	GCM	43	0	0	3	5350	DCX
KSL	04/06/2024	GCM	154	0	0	1	2200	DXK
KSL	04/06/2024	GCM	53	0	0	1	2700	HDK
KSL	04/06/2024	GCM	12	0	0	3	16290	X1K

6. For the processing to continue, we will change the value of the parameter ‘CRNegativeSoldHandling’ to 0. And click on save button.

Support>>ROA Tools>>Overrides>>Property
Attributes>>CRNegativeSoldHandling

7. Once the changes are saved. Go to the monitoring dashboard and resume the failed job.

Support>>Monitoring Dashboard>>Jobs>> Select failed Job>>Problems>>Resume

8. Open a techops ticket as below to rectify the negative sale in the past.

To : IDeaS TechOpsRequest <opsrequest@ideasinc.atlassian.net>

CC: Soibam Singh <Soibam.Singh@ideas.com>; Ranjit Phatak
<Ranjit.Phatak@ideas.com>; Akshay Junghare <Akshay.Junghare@IDeaS.com>;

<Sagar.Bansod@IDeaS.com> and Shift Coordinators

Hello Team,

Please run the below query.

Could you please have the following query executed for the property “China World
Hotel, Beijing”.

Client Code : <Client Code>

Client Name : <Client Name>

Property Code : <Property Code>

Property Name : <Property Name>

Property ID : <Property ID>

Following are the details

SAS Server Name : <SAS Server Name>

Please update the negative sold in SAS:

libname sas 'C:\SAS\Data\properties\ <Property ID>;

data sas.<table_name_received_in_the_error>;modify sas.

<table_name_received_in_the_error>;where rooms_sold<0; rooms_sold= 0; run; run;

EXAMPLE :

```
data sas.mkt_accom_inventory;modify sas.mkt_accom_inventory;where  
rooms_sold<0; rooms_sold= 0; run; run;
```

9. Changing the value of the parameter CRNegativeSoldHandling is only done to resume the job. Hence, it is important to change the value to its default once the above query is completed by techops. **Revert the parameter to default after TechOps successful response.**
