Pace Queries- Draft (Do not Refer)

Pace Queries (Need to check 02112646)

- If the client’s concern is that there is **discrepancy between Occupancy On-Books in Booking pace report and the PMS**
 - First we have to retrieve the report and see whether the difference is nominal or not. In case it is nominal we have to inform the client that it is expected we can make the client understand with the help of these two below mentioned articles:
 - Help>Search “[Why do I See Data Differences between Different Levels?](#)”
 - Help>Search “<https://g3.ideas.com/help/Content/FAQs/Forecast-Group-Property-Data.htm>”
 - In case the difference is huge, then it needs to be investigated
 - If the client is referring only for a single day, the information can be fetched from Business Insights.
 - If the client is referring to multiple dates, then we need to liaise with QA and get the details on which dates we get the incorrect data or the figures not as expected.
 - Client response: We need to include the detailed information why the **discrepancy** is there including the dates.
 - **Rate parity issues among different levels**
 - We may provide the explanation provided at “<https://g3rms.ideas.com/help/Content/FAQs/Forecast-Group-Property-Data.htm>”
 - **Discrepancies between Rate Code and Market Segment Level Pickup**
 - We may provide the explanation with the help of “<https://g3rms.ideas.com/help/Content/FAQs/Rate-Code-Market-Segment-Pickup.htm>”
