Precaution to be undertaken before issuing email to client for HTNG type decision upload failures

Currently G3 does not allow a monitoring team member to identify the ‘outbound’ name for a property – correctly – within the exception of the failure – given that the outbound channel selection is done from an available list – like HBSi , Trust etc.

As an outcome one should check the name of the outbound URL before issuing such emails.

Please refer the below screen shot – Whenever a failure exception is generated for HTNG decision upload – you would be tempted to check the external system name (Execution Parameters >> externalsystemname).

In the above case we can see that the failure is shown for Hbsi. **DO NOT USE THIS FOR COMMUNICATION WITH CLIENT**

Problem Detail

▼ Problem Summary - 243340

Job Instance Id : 14487791

Job Name : HTNG Decision Delivery Job

Step Name : dailyBarDeliveryStep

System Mode : Decision Delivery Mode

Creation Date : 19-Mar-2018 22:45:34 PM

Problem Id : 243340

Owner : Chinmay Hogare

Creation Date : 19-Mar-2018 22:45:48 PM

Closed Date : 19-Mar-2018 22:49:56 PM

Duration : 00:04:07

Error Code : HTNG_INTEGRATION_ERROR

Node : us2p3ap21

Client Code : DANAT

Client Name : Danat Hotels & Resorts

Property Code : 0006

Property Name : Danat Al Raha Beach Hotel

Problem Description

Tetris Errors: [133 - HTNG_INTEGRATION_ERROR - The web service returned a null error - null. - UserId: null - Workcontext: null]

IdeaS

before sending out email to client please check in Outbound Connection Details (Support >> Configuration >> Property (Select appropriate client and property name) >> Outbound Connection Details) – Refer Below screenshot.

The failure is shown for Hbsi but we are uploading decisions to Rategain.

In this scenario the upload appears to be configured under ‘HBSI’ – But in reality we are sending decisions to Rategain.

Before sending out email to client for this types of failure for HBSI or any HTNG mechanism please verify above steps and send notification accordingly.
