Pricing Discrepancy

Case Query:

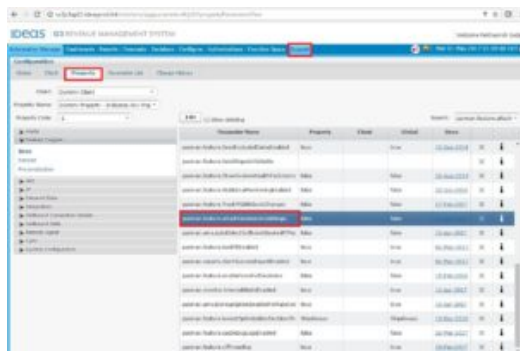

- **Rate doesn't match between G3 and Hotel Selling System**
 - Check the decision upload configuration (forecast window, offsets, tax if applicable), channels to which we are uploading decisions.
 - If there are changes in configurations required, incorrect configurations are updated – bring it to the notice of TL on shift.
 - Agree on the next steps, this would require CS team involvement as well – so that the CRM/CPM is informed
 - Review decisions file (Hilton and ESA) (use query for Prod2), get the details with the help of related Co relation IDs (OPERA Agent Properties and Protel Properties)
 - Query:
 - Before initiating the full upload, we need to activate the parameter to see the file: Dashboard>Support>Configuration>Property> set the parameter “pacman.feature.attachDecisionstoJobSteps” to True

- Check whether the decisions were uploaded to all the selling channels or not.
- Resolution: Typically full upload should resolve the issue
- Client response: We have to include the reason (exactly why the issue happened) and the resolution as well.
