Process – Enable Extended Stay Functionality

ICS – as of 26th Feb 2018 may get requests from EPM/ERM’s to enable – extended stay functionality for a property . Steps below illustrate the work that is undertaken to accomplish this. It also illustrates – what’s the typical setting in such scenarios

Below is a sample configuration of a property where Extended Stay is ‘**not**’ enabled:

G3 Parameter
is **pacman.demandAndWashManagement.UIExtendedStayEnabled=FALSE**

IDEAS G3 REVENUE MANAGEMENT SYSTEM

Configuration

Global Client Property Parameter List Change History

Client: Extended Stay America

Property Name: 47 Cleveland - Great Northern Hall

Property Code: 2445

Search: pacman.demandAndWashManagement.UIExtendedStayEn

	Parameter Name	Property	Client	Global	Since	
	pacman.demandAndWashManagement.UIExtendedStayEnabled	false		false		
	pacman.ams.amsFabuildEnabled	false		false	18-Jun-2017	
	pacman.feature.attachDecisionstoJobSteps	false		false	16-Jan-2017	
	pacman.ams.autoDetectSufficientBookedRTPlace	false		false	18-Aug-2017	
	pacman.feature.automatedEmailStandardEnabled	true		true	24-Oct-2017	
	pacman.feature.backfillEnabled	false	false	true	03-May-2017	
	pacman.ams.calculateNonPickedUpBlocksUsingSummaryData	false		false	21-Jul-2017

if you get a task /case asking you to enable Extended Stay – here’s what you should do .

Set the below parameter to true in the G3 configuration screen for ‘that’ property.

pacman.demandAndWashManagement.UIExtendedStayEnabled=TRUE

Client then should see the Demand and Wash screen with standard LOS buckets (1-8), as well as additional LOS buckets (created by analytics) in Override by Arrival by LOS tab:

Even you can verify this after having had made the change to see if this becomes available.
