Processing Issue – linkSrpDownloadAndResolveOptimizedStep – Circular SRPs mapping

This document guides you in identifying the Circular mapping of SRPs and to push the processing for the day.

Job Name: Process CRS Extract BDE
Step Name: linkSrpDownloadAndResolveOptimizedStep

Problem Description –

java.lang.OutOfMemoryError: Java heap space

OR

java.lang.OutOfMemoryError: Requested array size exceeds VM limit

When you encounter the above failure, it is due to the circular(cyclic) mapping of SRPs.

For example, SRP A is mapped to SRP B and then again SRP B is mapped to SRP A.

SOLUTION:

1. To identify the SRPs with circular mapping use the below query at the property level

Categories

Select Category

select * from linked_srp_mappings a where exists (select * from linked_srp_mappings b where a.SRP_Code = b.Linked_SRP_Code and a.Linked_SRP_Code = b.SRP_Code)

This query will give you the SRPs with Circular mapping as shown below:

SRP_Code	Linked_SRP_Code
ODBB15	ODBB12
ODBB12	ODBB15
ODCC15	ODCC12
ODCC12	ODCC15

Note down all the SRPs in Excel in below format :

	SRP_Code	Linked_SRP_Code
1	ODBB12	ODBB15
	ODBB15	ODBB12
2	ODCC12	ODCC15
	ODCC15	ODCC12

3. Execute the below query at the Ratchet level to delete these SRPs from client_linked_srp_mappings

delete from client_linked_srp_mappings where linked_srp_code in(<'SRP1','SRP2','SRPn',...>) and property_code='<property_code>';

Example :

delete from client_linked_srp_mappings where linked_srp_code in('SDT23B','SDT25B','SDT23C','SDT25C') and property_code='HFDCT';

4. Abandon the failed job.
5. Navigate to Installation Screen > Process Extract and Reprocess/run the failed job.

Extract Type

☒ CRS

☐ T2SNAP

Processing Type

☒ BDE

☐ CDP

Re-run the latest file: DLUAC.20240711.0401.tar.Z

Run from directory:

C:\G3\Data\CRSData\archive\2024_07\Hilton\DLUAC\DLUAC.20240711.0401.tar.Z

Run

6. Escalate the Issue to the Client.

This is to inform you that we are facing a processing issue for the below property:

Property Code: [Property Code]
Property Name: [Property Name]

Upon investigation, We have found that the Property has cyclic mapping of SRP which are listed below.

	SRP_Code	Linked_SRP_Code
1	ODBB12	ODBB15
	ODBB15	ODBB12
2	ODCC12	ODCC15
	ODCC15	ODCC12

We have temporarily pushed processing for now but it will affect the next optimization.

Could you please review these SRPs and update us accordingly?

In case, you have any questions or concerns, please do not hesitate to email us at CARE@ideas.com.

[Your Signature]

NOTE: If you need to push the processing for every BDE if it is not fixed by the client. To do this, once the failure is received follow step 1 to 5.
