Radisson Curtis C failures – Handling and investigation

ERROR1

=====

One or more room types missing for date

=====

Scenario 1

If failed in Daily Bar step

1. Use the CMA query “To find out RT details for given occupancy date” to find out the list of Room Type for which we are generating decisions.
2. Send that Room Type list to client and ask them to confirm the Room Type list configured in Curtis C.

Scenario 2

If failed in MinLOS step

1. Use the CMA query “Find missing rates for room types in the restriction configuration” to find out the Room Type for which the rate is missing.
2. Once you have the Room Type check that room type in “Restriction Configuration Screen” and send the screen shot to client asking to complete the configuration, refer the below screen shot.

- HLTN/Handling Error for SAS Dataset Encoding Job

Below is the screen shot for you reference.

Please completed the configuration and update us accordingly.

a. First find if the property has any zero capacity room types, this we can find from **Configure >> Rooms Configuration**.

[illegible]

b. Then go to **Configure >> Restrictions** and the click on **Mass Restriction Configuration** option in top right corner.

d. Select the option “All” and click on Export, an excel sheet will be downloaded which looks as below.

e. Do a Pivot table (**Insert >> Pivot Table**) on this data by using below options.

f. After doing pivot the data will be displayed in the below format.

g. Please exclude all the zero room types from the sheet if any (There is no point in asking the client to configure data for the zero capacity room types because we do not generate decisions for zero capacity room types).

h. After excluding zero capacity room types, please highlight all the blank column(s)/row(s) as shown below

i. Send an email to client by attaching the excel sheet, example to email is below.

ERROR 2

=====

Invalid Start/End Date Combination (Season Gap for G001)

=====

- 1. Please try sending Full Decision to Curtis C.
- 2. If it fails again after sending Full Decisions then send and an email to Client and mentioned we tried sending Full Decisions but still it is failing due to this error, refer the below screen shot.

ERROR 3

=====

=====

**Length-of-stay inconsistency within room category SUP1 for Y-POSR on date
2019-10-11**

=====

=====

1. In Restriction Configuration screen check room category SUP1 in Y-POSR for the mentioned date, the rates should be same for all days.
2. If the rates are different for some days then please send the screen shot to client asking to correct the configuration, refer the below screen shot.

ERROR 4

=====

A-RACK is tax inclusive

=====

1. This error comes when client has configured TAX in his system (PMS, CRS ect)
2. In G3 system Go to Configure >> Property Specific >> Manage Property information and you can see client have not configured the TAX – Refer the below snippet.

3. Please ask client to complete the configuration in above screen for TAX.
