Reduce Forecast window in G3

As of now There is not a formal procedure to reduce this window as the consequence of such a reduction in the window is currently being evaluated by the IDeaS G3 QA teams.

Until further notice – for all general purposes CARE should refrain from reducing forecast windows.

However if there are business contingencies – then the caveat to this reduction is that stale forecasts would sit in the system and would ‘not’ change and must be clearly negotiated via the property PM/CRM before such a reduction is undertaken. Please clearly talk to the case owner with these detail until an alternative is presented.
