Resolving Daily Processing Failures at Sofitel Cairo Nile El Gezira (H5307)

Hello Team,

This document provides a structured approach to resolving daily processing failures, ensuring clarity and ease of implementation for support teams at Sofitel Cairo Nile El Gezira.

Issue Description:

Daily processing failures occur at Sofitel Cairo Nile El Gezira (H5307) due to incorrect data received in daily feeds.

Error Message:

=====

Tetris Errors: [34 – DATABASE_EXCEPTION – Tetris Errors: [34 – DATABASE_EXCEPTION – Error occurred calling stored proc for purging db – User.id: 55049 – Workcontext: null]

com.microsoft.sqlserver.jdbc.SQLServerException: Cannot insert duplicate key row in object 'dbo.Reservation_Night' with unique index 'UQ_Reservation_Night'. The duplicate key value is (8403054, 2023-11-22, 2023-11-22).

=====

Resolution Steps:

1. Identify Correlation ID:
 - Navigate to failed processing.
 - Open the job causing the failure.

- [illegible]

- Access CMA (Configuration Management Application).
- Locate SQL Tab and select the script titled “Rushabh : Accor 5307 : Delete empty confirmation number reservation from history table”.
- Input the copied correlation ID into the script parameters.
- Execute the script to clean up duplicate data.

[illegible][illegible]

- Go to Jobs abandoned/ failed as well as if running opera data load / opera data load CDP jobs.

- Reprocess failed job again for which data was cleaned up in above step using cma.

- Sequentially process Opera data load jobs that were identified as abandoned in step 3.
- Ensure jobs are processed in the correct order to prevent further issues.
