SPM – Email Communication – G2 & G3

SPM – Email Communication – G2 & G3

The purpose of this document is to outline the standard process of email communication for G2 & G3.

As we all are aware, the primary objective / goal of the monitoring team is the 8 AM decision dispatch – means – the system should be updated and the decisions/controls are dispatched to the property selling systems before 8 AM client local time. In case of delays with the optimization at the scheduled time, SPM Team needs to send a notification to the client informing about the delays.

The email notification should contain the following –

1. Correct Chain Code & Property Name
2. Correct Recipient email IDs
3. Issue Details
4. The optimization which is impacted due to the identified issue (BDE/IDP1/IDP2 etc.)
